Pedrollo SpA, established in 1974, has grown by concentrating on the innovation, quality and reliability of its products and in its more than 40 years of history it has assumed an international dimension.

Recognised as one of the leading manufacturers of pumps worldwide it exports more than 90% of its production to 160 countries in five continents although development and production remain proudly Made in Italy.

Through a constant control of the entire manufacturing process from the purchase of the raw materials to the assistance given to its clients, as well as the choice of the technologically most advanced solutions, Pedrollo guarantees the extremely high quality of its products.

The use of sophisticated robots and production lines in the forefront of technology enable the company to produce more than two million pumps a year, with a range which includes more than one hundred families and models suitable for every requirement.

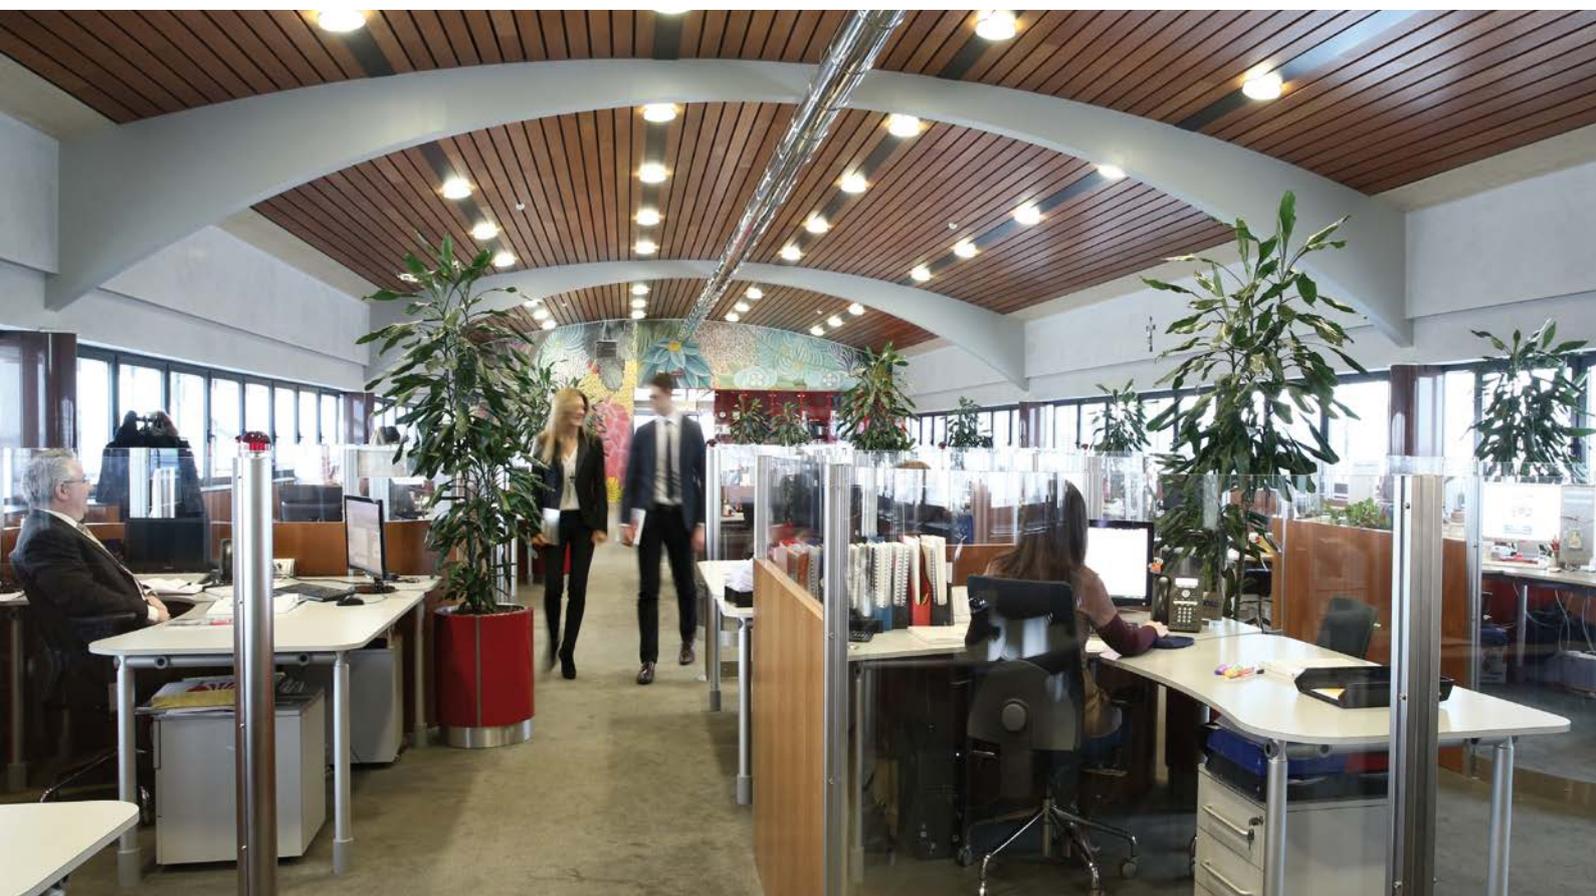

International growth is supported by a sales network which guarantees a wide range of products to the ultimate clients. Pedrollo pumps are designed to be used for most domestic, civil, agricultural and industrial applications.

The salesforce consists of professionals from many parts of the world, a feature which provides clients with a service of the highest quality and personal advice regarding the best solution to adopt.

In order to design the pumps the research and development department of Pedrollo uses the most sophisticated instruments, whilst its state of the art laboratory for hydraulic tests and the workstations for fluid dynamic calculations and analysis of the finished components support the continuous development of new models as well as improvements to the current range of products.

Technology, creativity and passion are the fundamental components of the production philosophy of Pedrollo which offers its clients a simple and reliable product with a remarkable performance, as shown by the attention to the sturdiness of the pumps and the constant reduction in energy consumption.

 **PEDROLLO**[®]
the spring of life

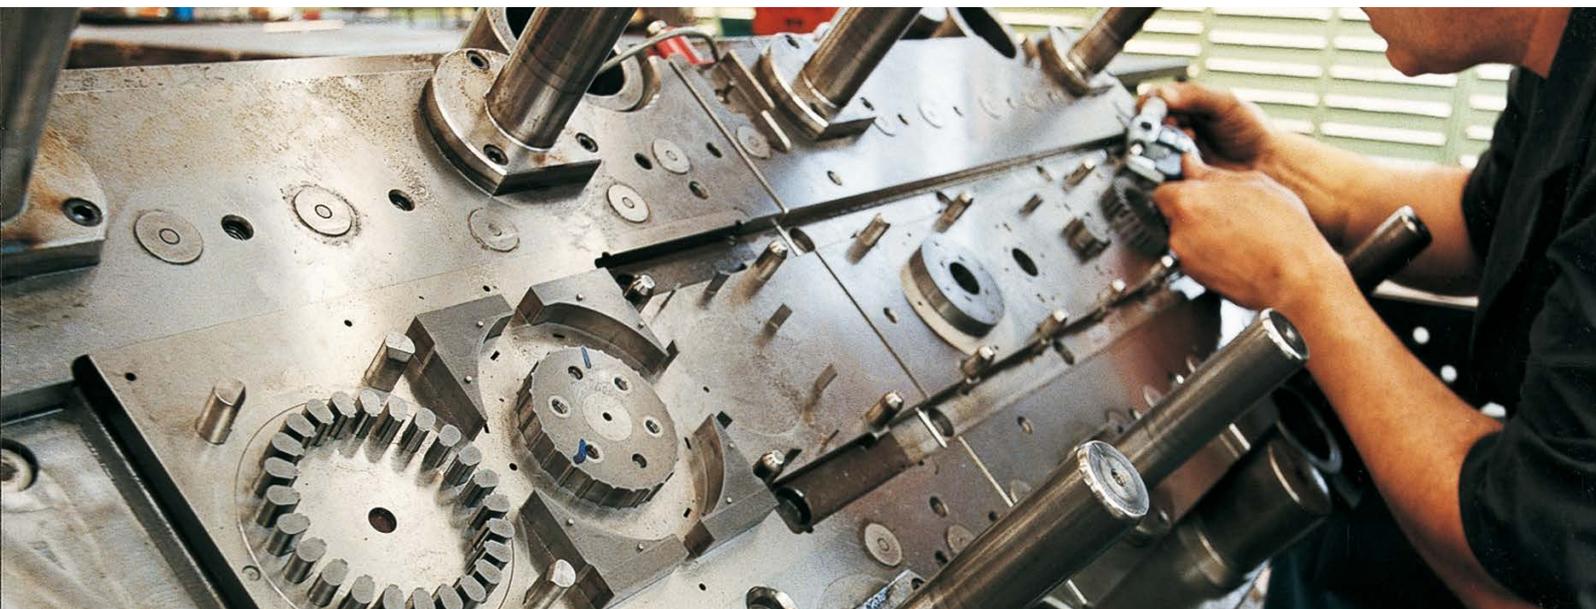

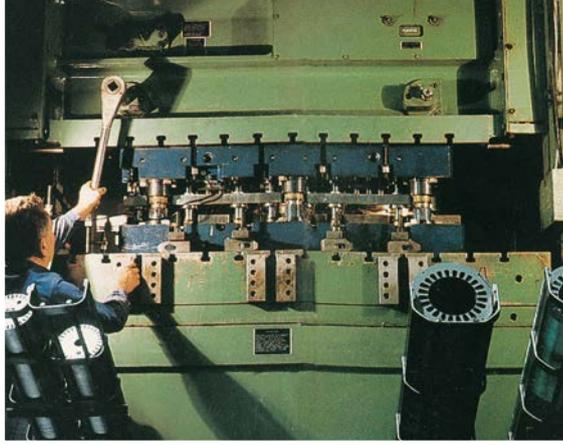

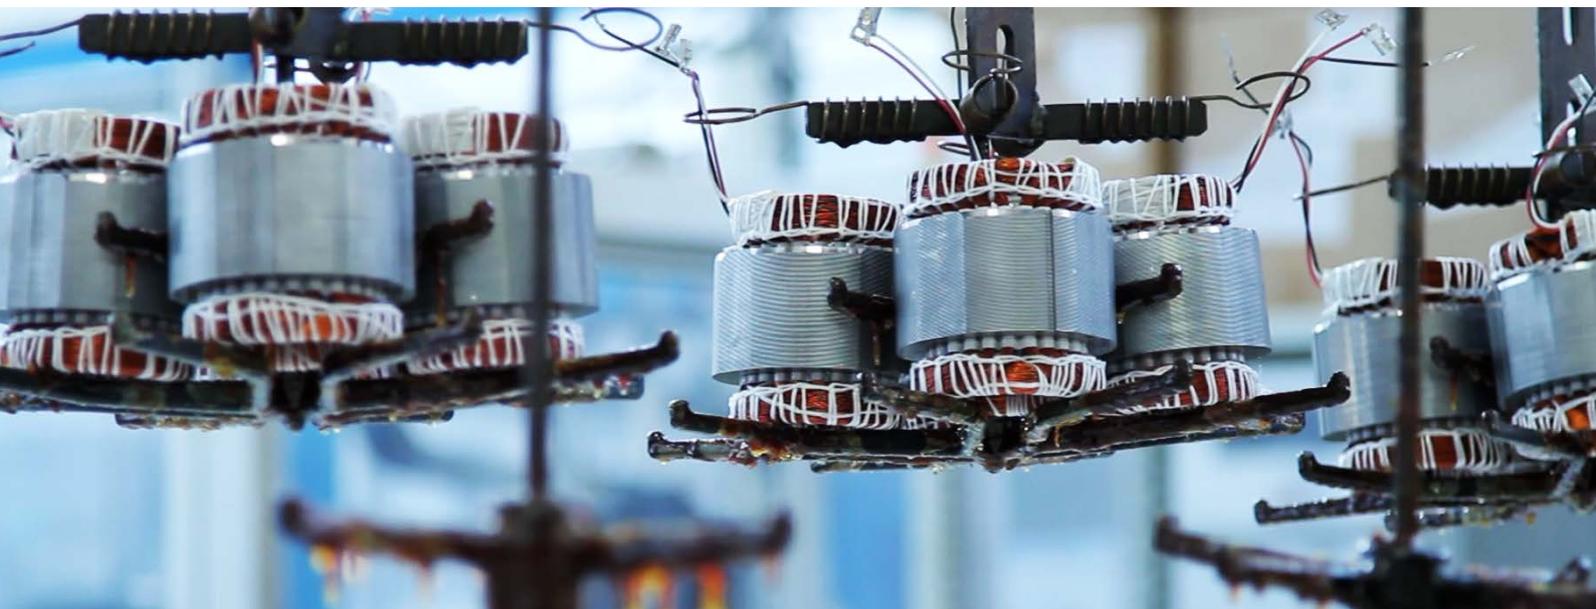

Pedrollo is able to manufacture all the components of its pumps in house. It has its own foundry, a machine shop for pressing steel components, a motor windings division and mechanical work centres which at all times guarantee the greatest precision and the highest quality.

The factories continue to expand and cover an area of 100,000 square metres. They are noteworthy for the extremely automated processes, in which innovative technology and the training of the staff play a leading role.

Automated lines supply and control the final assembly of the pumps, thus guaranteeing the high quality standards of Pedrollo throughout their assembly. The continuous automated tests which are carried out directly guarantee that the finished product will always be available in a very short time.

Pedrollo has a well-equipped hydraulic and electrical laboratory whose task is to test the new models which have been designed before they can enter production.

The laboratory is fitted with a rig capable of reproducing even the most difficult working conditions for the pumps: it is thus possible to directly verify the efficacy of a project and guarantee the quality and reliability of the Pedrollo products to the clients.

EU REGULATION N. 547/2012

- Pumps with a minimum efficiency index $MEI \geq 0.40$ in conformity with the EU Regulation in force from 1st January 2015.
- The bench mark for the most efficient water pumps is $MEI \geq 0.70$.
- The efficiency of a pump with a trimmed impeller is usually lower than that of a pump with a full diameter impeller. The trimming of the impeller adapts the pump to a fixed duty point, resulting in a lower energy consumption. The minimum efficiency index (MEI) is based on the full diameter impeller.
- The functioning of the water pump with variable places of operation can be more efficient and economical if, for example, it is controlled by means of a variable speed motor which adjusts the function of the pump to the system.
- The information regarding the bench mark efficiency is available at: www.europump.org/efficiencycharts

GUARANTEE

- All Pedrollo Pumps are guaranteed for a minimum of one year subject to the terms and conditions of Pedrollo SpA as long as any necessary spare parts fitted during the period of guarantee are original Pedrollo spare parts.

Pumps with peripheral impeller

 Clean water

 Domestic use

PERFORMANCE RANGE

- Flow rate up to **90 l/min** (5.4 m³/h)
- Head up to **100 m**

APPLICATION LIMITS

- Manometric suction lift up to **8 m**
- Liquid temperature between **-10 °C** and **+60 °C**
- Ambient temperature up to **+40 °C** (**+45 °C** for PK 60)
- Max. working pressure:
 - **6 bar** for PK 60, PK 60-MD, PK 65
 - **7 bar** for PK 70, PK 80
 - **10 bar** for PK 90, PK 100, PK 200, PK 300
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

Suitable for use with clean water that does not contain abrasive particles and with liquids that are not chemically aggressive towards the materials from which the pump is made. Because of their reliability and the fact that they are easy to use and are economical, they are ideal for domestic use and in particular for distributing water in combination with small pressure tanks and for the irrigation of gardens and orchards. The pump should be installed in an enclosed environment or sheltered from inclement weather.

INSTALLATION AND USE

Suitable for use with clean water that does not contain abrasive particles and with liquids that are not chemically aggressive towards the materials from which the pump is made. Because of their compactness, reliability and the fact that they are easy to use, they are suitable for use in domestic applications such as the distribution of water in combination with small pressure tanks, for the irrigation of gardens and orchards, for drawing water from tanks and for all those other situations where air or gas may be present in the water to be pumped. The pump comes complete with a flap-check valve. The pump should be installed in an enclosed environment or sheltered from inclement weather.

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

Suitable for use with clean water and with liquids that are not chemically aggressive towards the materials from which the pump is made. The hydraulic characteristics of this pump make it suitable for use in industrial applications.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

INSTALLATION AND USE

Suitable for use with clean water that does not contain abrasive particles and with liquids that are not chemically aggressive towards the materials from which the pump is made. The design features of these particularly compact brass pumps provide a guarantee against rust and oxidation; they are therefore recommended for industrial applications such as cooling and air conditioning. The pump should be installed in an enclosed environment or sheltered from inclement weather.

INSTALLATION AND USE

The **PQA** pumps are recommended for pumping clean water without abrasive particles and with liquids which are not chemically aggressive towards the materials with which the pump is made. The RYTON and brass pump body construction guarantees against the formation of rust and oxidation. Because of these characteristics these pumps are suitable for use in industrial applications such as cooling, air conditioning, laundries, etc. The pump should be installed in an enclosed environment or sheltered from inclement weather.

INSTALLATION AND USE

Suitable for use with clean water and with liquids that are not chemically aggressive towards the materials from which the pump is made. Because they are reliable and easy to use these pumps are widely used in domestic and civil applications such as the distribution of water in combination with small and medium sized pressure tanks, for transferring liquids and for the irrigation of gardens and orchards.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

AL-RED

Stainless steel centrifugal pump

-  Clean water
-  Domestic use
-  Agricultural use
-  Industrial use

PERFORMANCE RANGE

- Maximum flow rate **160 l/min** (9.6 m³/h)
- Maximum head **23 m**

APPLICATION LIMITS

- Manometric suction lift up to **7 m**
- Liquid temperature between **-10 °C** and **+90 °C**
- Ambient temperature between **-10 °C** and **+40 °C**
- Max. working pressure **4 bar**
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

EU REGULATION N. 547/2012

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

Suitable for use with clean water and with liquids that are not chemically aggressive towards the materials from which the pump is made. Because of its design features this centrifugal pump is recommended for use in domestic, agricultural and industrial applications. All the components in contact with the pumped liquid are in stainless steel AISI 304 thus guaranteeing complete hygiene and maximum resistance against corrosion. The pump should be installed in an enclosed environment or sheltered from inclement weather.

Centrifugal pumps with open impeller

-  Clean water
-  Domestic use
-  Agricultural use
-  Industrial use

PERFORMANCE RANGE

- Flow rate up to **350 l/min** (21 m³/h)
- Head up to **20 m**

APPLICATION LIMITS

- Manometric suction lift up to **7 m**
- Liquid temperature between **-10 °C** and **+90 °C**
- Ambient temperature between **-10 °C** and **+40 °C**
- Max. working pressure **6 bar**
- Passage of suspended solids up to **Ø 10 mm**
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

EU REGULATION N. 547/2012

INSTALLATION AND USE

Suitable for use with liquids that are not chemically aggressive towards the materials from which the pump is made.

The open impeller design allows **liquids containing relatively high levels of impurities** to be pumped without the risk of the impeller clogging. Because of these characteristics the **NGA** series pumps are used specifically in industry and for transferring water from canals, rivers, reservoirs, tanks, etc. The pump should be installed in an enclosed environment or sheltered from inclement weather.

INSTALLATION AND USE

Suitable for use with liquids that are not chemically aggressive towards the materials from which the pump is made.

The open impeller design allows **liquids containing relatively high levels of impurities** to be pumped without the risk of the impeller clogging. All of the components in contact with the pumped liquid are constructed in **stainless steel AISI 316**. Because of this characteristic the **NGA-PRO** series of pumps are particularly suitable for use in plants for washing fruit, vegetables, fish and shellfish, in industrial washing plants and for the circulation of cooling liquids. The pump should be installed in an enclosed environment or sheltered from inclement weather.

INSTALLATION AND USE

Suitable for use with clean water and with liquids that are not chemically aggressive towards the materials from which the pump is made. The high performance and adaptability to a wide range of applications make them the ideal choice in domestic, civil and industrial applications, in particular for the distribution of water in combination with pressure tanks for boosting pressure in the network and for firefighting sets.

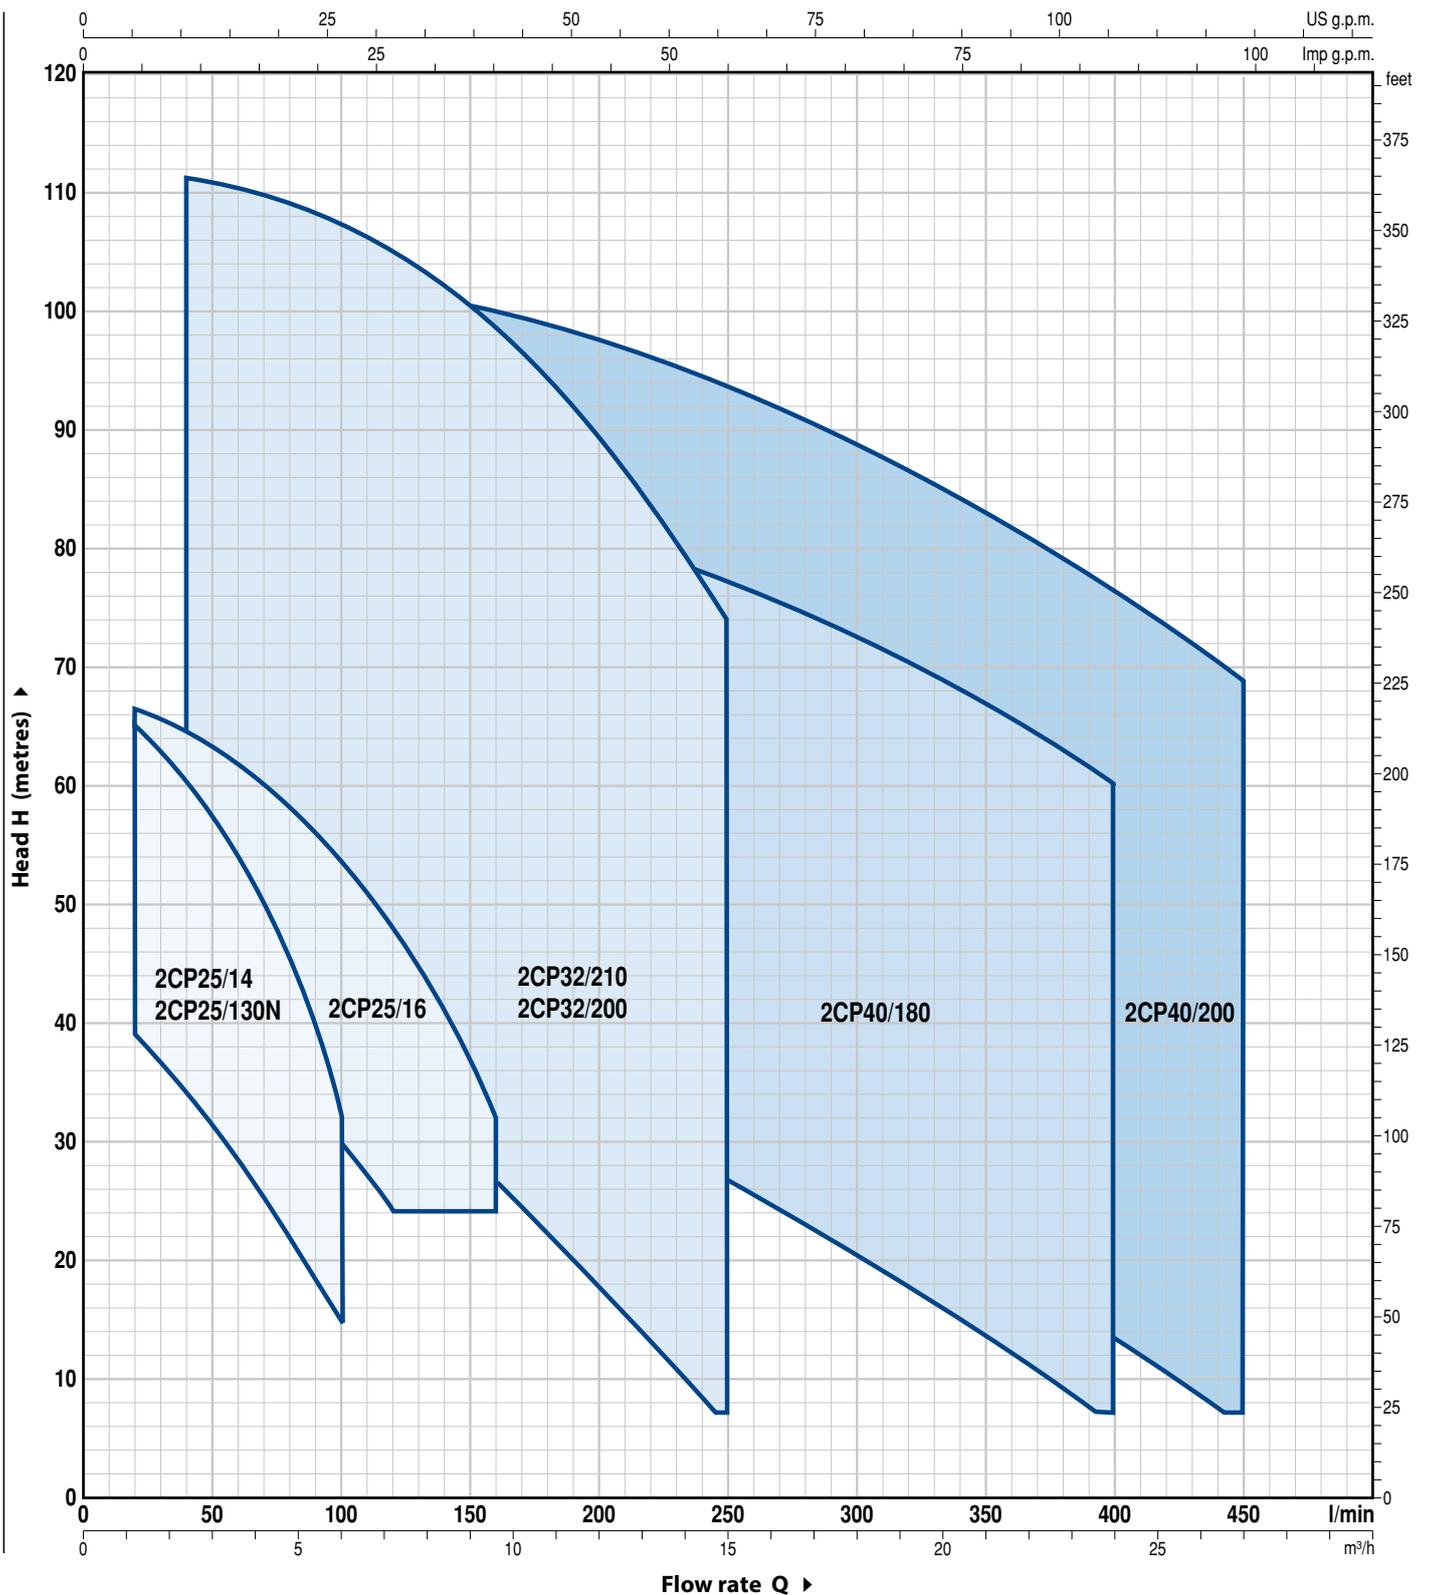

The pump should be installed in an enclosed environment or sheltered from inclement weather.

Multi-stage centrifugal pumps

 Clean water

 Domestic use

PERFORMANCE RANGE

- Flow rate up to **130 l/min** (7.8 m³/h)
- Head up to **52 m**

APPLICATION LIMITS

- Manometric suction lift up to **7 m**
- Liquid temperature between **-10 °C** and **+40 °C**
- Ambient temperature up to **+40 °C**
- Max. working pressure **6 bar**
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

Suitable for use with clean water and with liquids that are not chemically aggressive towards the materials from which the pump is made. As a result of their quietness, these pumps are widely used in domestic applications such as the distribution of water in combination with small and medium sized pressure tanks, and for the irrigation of gardens and orchards, etc.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

INSTALLATION AND USE

Suitable for use with clean water and with liquids that are not chemically aggressive towards the materials from which the pump is made. The high performance and adaptability to a wide range of applications make them an ideal choice in domestic, civil and industrial applications, in particular for the distribution of water in combination with pressure tanks and for boosting pressure in the network. The pump should be installed in an enclosed environment or sheltered from inclement weather.

-  Clean water
-  Domestic use
-  Civil use
-  Agricultural use

PERFORMANCE RANGE

- Flow rate up to **50 l/min** (3 m³/h)
- Head up to **51 m**

APPLICATION LIMITS

- Manometric suction lift up to **9 m** (HS)
- Liquid temperature between **-10 °C** and **+90 °C**
- Temperature of diesel up to **+55 °C**
- Ambient temperature up to **+40 °C**
- Max. working pressure **6 bar**
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

Suitable for use with diesel, clean water that does not contain abrasive particles and with liquids that are not chemically aggressive towards the materials from which the pump is made. Because of a specific principle of their operating performance these pumps are an excellent solution in every case where a compact self-priming pump is required or when the fluid flow is irregular or contains air.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

PATENTS - TRADE MARKS - MODELS

INSTALLATION AND USE

Suitable for use with clean water and with liquids that are not chemically aggressive towards the materials from which the pump is made. The self-priming **JSW** pumps are designed to pump water even in cases where air is present. Because of their reliability and the fact that they are easy to use, they are recommended for use in domestic applications such as the distribution of water in combination with small or medium sized pressure tanks, and for the irrigation of gardens and orchards, etc. The pump should be installed in an enclosed environment or sheltered from inclement weather.

INSTALLATION AND USE

Suitable for use with clean water and with liquids that are not chemically aggressive towards the materials from which the pump is made. The self-priming **JSW** pumps are designed to pump water even in cases where air is present. Because of their reliability and the fact that they are easy to use, they are recommended for use in domestic, civil and industrial applications such as the distribution of water in combination with pressure tanks, and for the irrigation of gardens and orchards, etc.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

INSTALLATION AND USE

The self-priming **PLURIJET** pumps are recommended for pumping clean water even in cases where air is present and for liquids which are not chemically aggressive towards the materials from which the pump is made.

Because of their silence, reliability and low energy consumption they are recommended for domestic and civil applications, in particular for pressurising and distributing water in combination with pressure tanks, for the recovery of rain water, for irrigation systems, etc.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

PLURIJET 90-130-200

Self-priming multi-stage pumps

-  Clean water
-  Domestic use
-  Civil use

PERFORMANCE RANGE

- Flow rate up to **200 l/min** (12 m³/h)
- Head up to **97 m**

APPLICATION LIMITS

- Manometric suction lift up to **9 m** (HS)
- Liquid temperature between **-10 °C** and **+40 °C**
- Ambient temperature up to **+40 °C**
- Max. working pressure **10 bar**
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

The self-priming **PLURIJET** pumps are recommended for pumping clean water even in cases where air is present and for liquids which are not chemically aggressive towards the materials from which the pump is made.

Because of their silence, reliability and low energy consumption they are recommended for domestic and civil applications, in particular for pressurising and distributing water in combination with pressure tanks, for the recovery of rain water, for irrigation systems, etc.

The pump should be installed in an enclosed environment or sheltered from inclement weather.

Standardised “EN 733” centrifugal pumps

 Clean water

 Industrial use

PERFORMANCE RANGE

- Flow rate up to **3000 l/min** (180 m³/h)
- Head up to **24 m**

APPLICATION LIMITS

- Manometric suction lift up to **7 m**
- Liquid temperature between **-10 °C** and **+90 °C**
- Ambient temperature between **-10 °C** and **+40 °C**
- Max. pressure in pump body **10 bar** (PN10)
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

Pump body dimensions in compliance with **EN 733**
EU REGULATION N. 547/2012

INSTALLATION AND USE

- Water supply
- Pressure boosting
- Irrigation
- Water circulation in air-conditioning units
- Cleaning sets
- Firefighting sets
- Industrial applications
- Agricultural applications

The pump should be installed in an enclosed environment or sheltered from inclement weather.

OPTIONS AVAILABLE ON REQUEST

- Counter flange KIT complete with bolts, nuts and washers
- Other voltages or 60 Hz frequency
- Compatibility with hotter or colder liquids
- Compatibility with hotter or colder environments

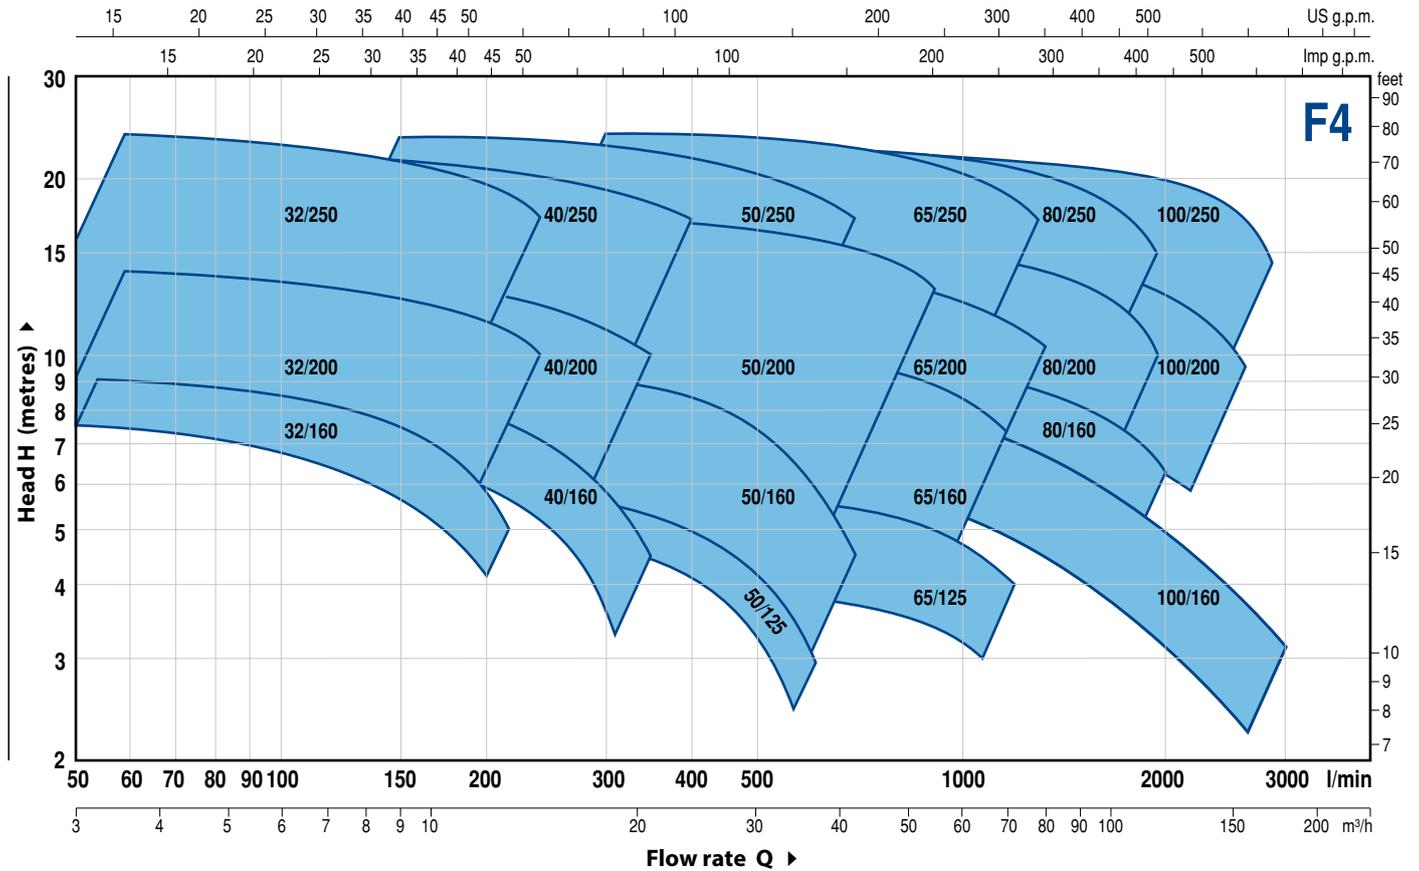

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

PERFORMANCE RANGE

50 Hz n = 1450 rpm

PERFORMANCE DATA

50 Hz n = 1450 rpm

Standardised “EN 733” stainless steel pumps

PERFORMANCE RANGE

- Flow rate up to **2200 l/min** (132 m³/h)
- Head up to **38 m**

APPLICATION LIMITS

- Manometric suction lift up to **7 m**
- Liquid temperature between **-10 °C** and **+90 °C**
- Ambient temperature between **-10 °C** and **+40 °C**
- Max. pressure in pump body **10 bar** (PN10)
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

Pump body dimensions in compliance with **EN 733**
EU REGULATION N. 547/2012

INSTALLATION AND USE

- Water supply
- Pressure boosting
- Irrigation
- Water circulation in air-conditioning units
- Cleaning sets
- Firefighting sets
- Industrial applications
- Agricultural applications

Suitable for use with clean, aggressive liquids that are chemically compatible with the materials from which the pump is made. The pump should be installed in an enclosed environment or sheltered from inclement weather.

OPTIONS AVAILABLE ON REQUEST

- Special mechanical seal
- Other voltages or 60 Hz frequency
- Compatibility with hotter or colder liquids
- Compatibility with hotter or colder environments

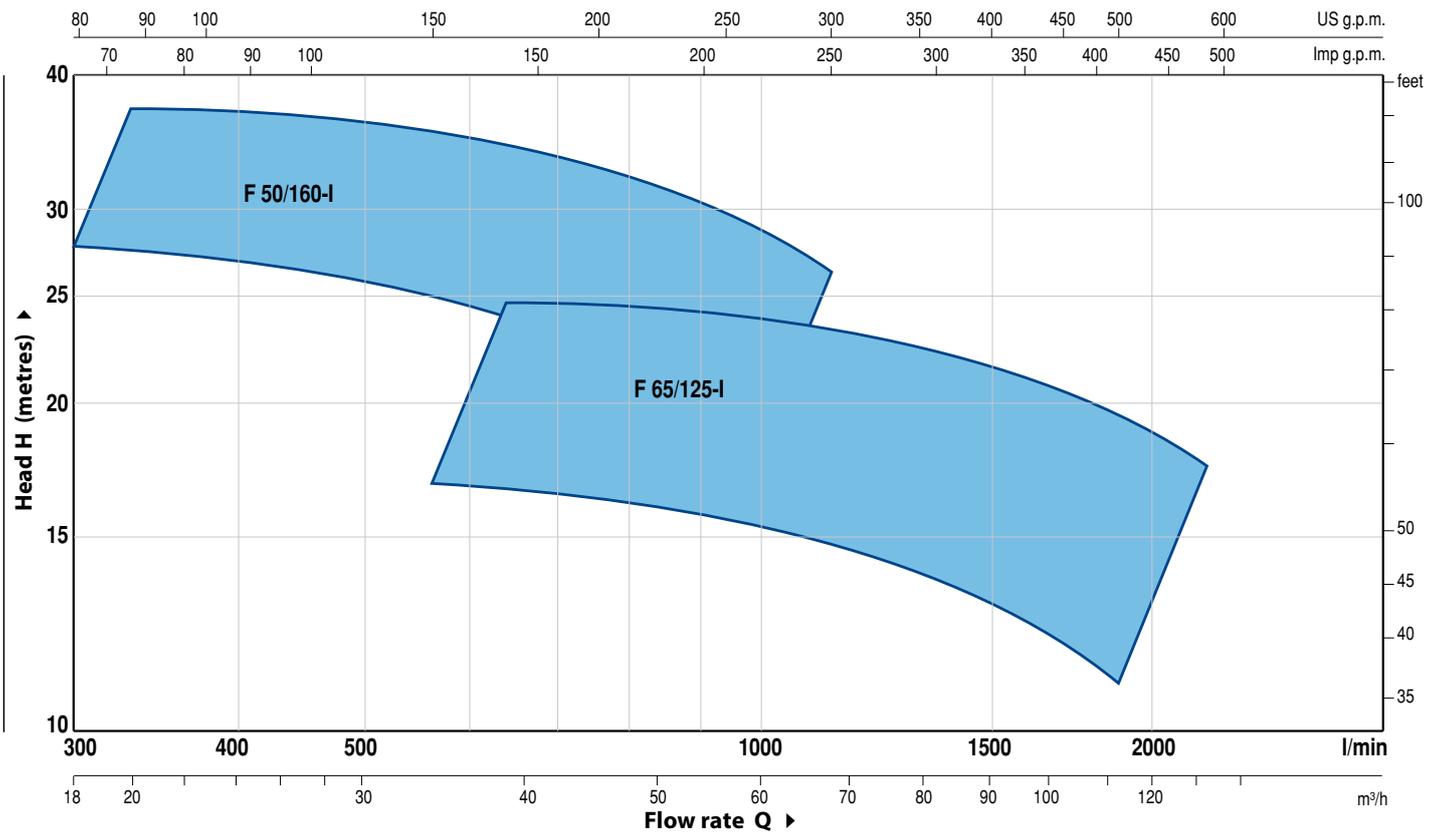

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY

Multi-stage submersible pumps

-  Clean water
(Maximum sand content 150 g/m³)
-  Domestic use
-  Civil use
-  Agricultural use

PERFORMANCE RANGE

- Flow rate up to **120 l/min** (7.2 m³/h)
- Head up to **95 m**

APPLICATION LIMITS

- Maximum liquid temperature **+40 °C**
- Maximum sand content **150 g/m³**
- **20 m** maximum immersion depth (with a sufficiently long power cable)
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

- **20 m** long power cable
- Float switch for single-phase versions

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

INSTALLATION AND USE

Because of their high efficiency and reliability they are suitable for use with clean water in domestic, civil and agricultural applications such as the distribution of water in combination with pressure tanks, for the irrigation of gardens and orchards and for pressure boosting, etc.

PATENTS - TRADE MARKS - MODELS

- Patent Pending n. PCT/IB2014/063126

OPTIONS AVAILABLE ON REQUEST

- Pumps without float switch
- Pumps fitted with power cables of other lengths
- Other voltages or 60 Hz frequency

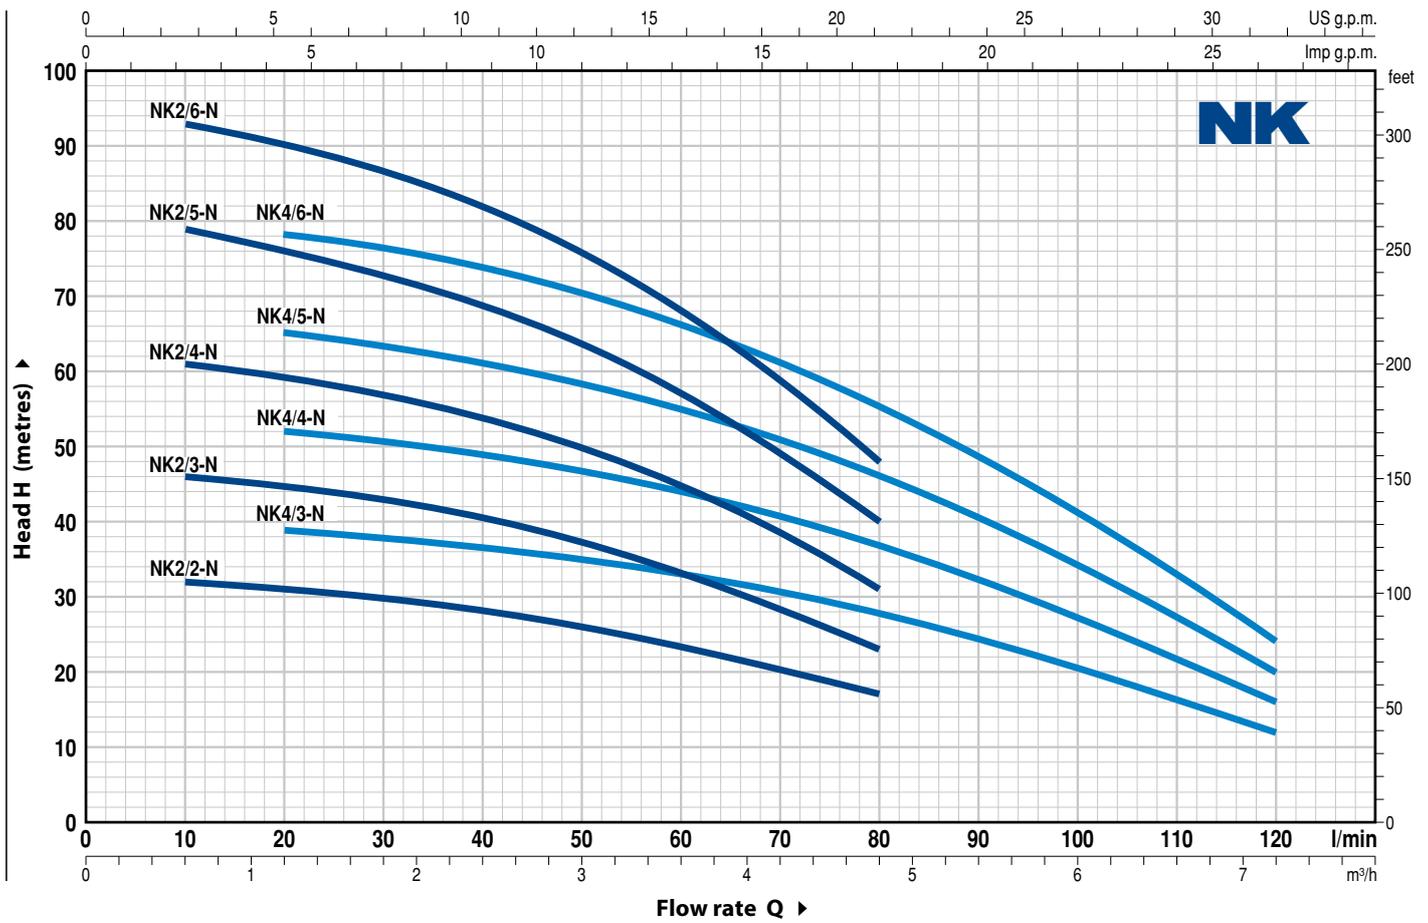

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

Multi-stage submersible pumps

-  Clean water
(Maximum sand content 150 g/m³)
-  Domestic use
-  Civil use
-  Agricultural use

PERFORMANCE RANGE

- Flow rate up to **180 l/min** (10.8 m³/h)
- Head up to **95 m**

APPLICATION LIMITS

- Maximum liquid temperature **+40 °C**
- Maximum sand content **150 g/m³**
- **20 m** maximum immersion depth (with a sufficiently long power cable)
- Vertical and horizontal installation
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

- **20 m** long power cable
- Float switch for single-phase versions

INSTALLATION AND USE

A new concept range of submersible multi-stage pumps designed guarantee even greater reliability, thanks to patented innovative technical solutions which prevent blockage of the pumps even after prolonged periods of inactivity.

Because of their high efficiency and reliability they are suitable for use with clean water in domestic, civil and agricultural applications such as the distribution of water in combination with pressure tanks, for the irrigation of gardens and orchards and for pressure boosting, etc.

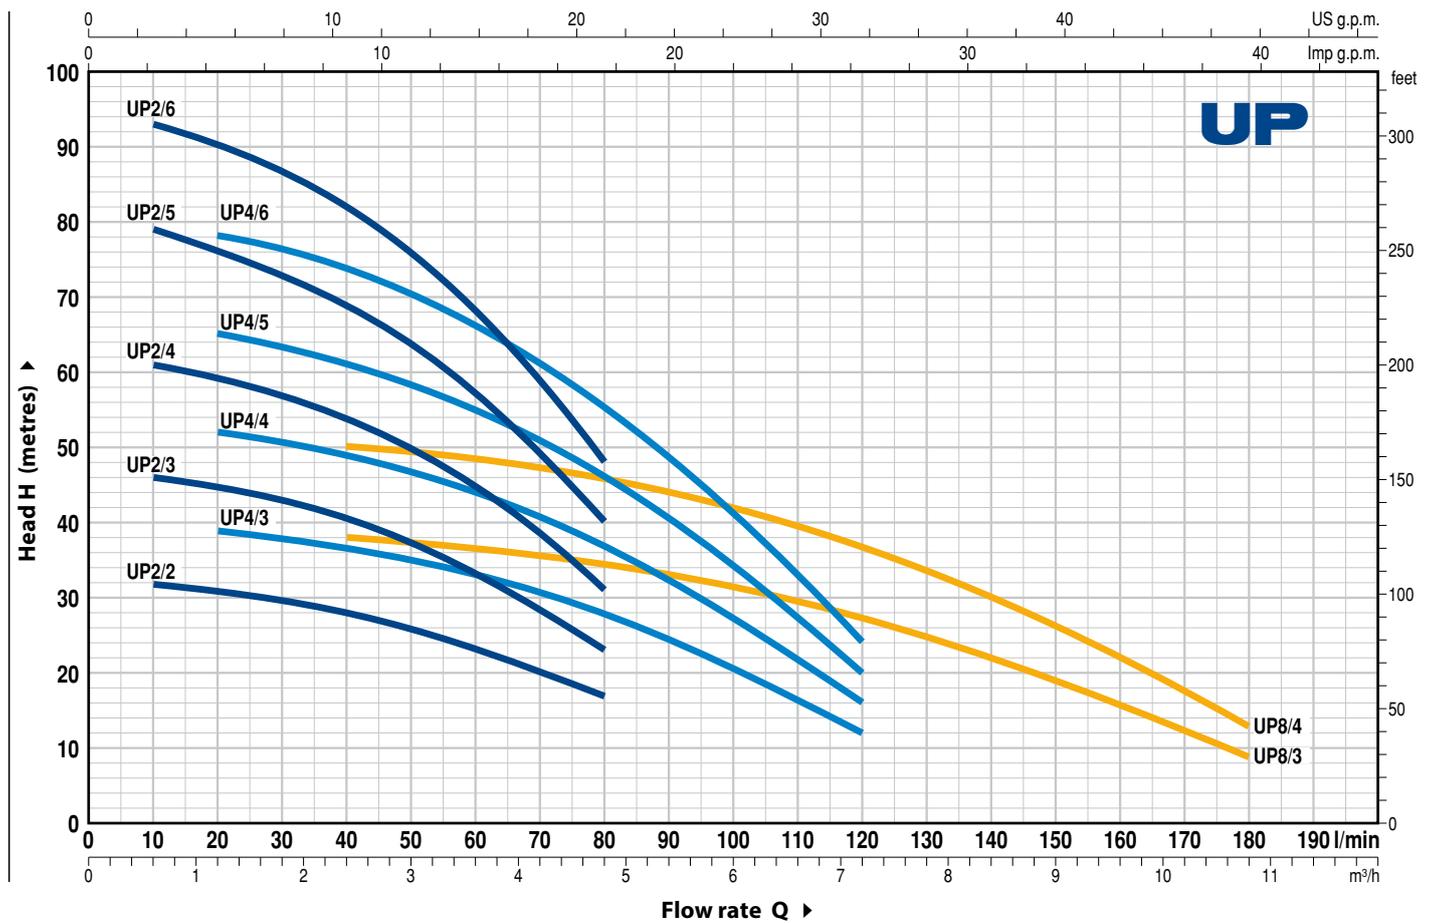

OPTIONS AVAILABLE ON REQUEST

- Pumps without float switch
- Pumps fitted with power cables of other lengths
- Other voltages or 60 Hz frequency
- **Support kit for horizontal operation**

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

Suitable for use with **clean water that does not contain abrasive particles** and with liquids that are not chemically aggressive towards the materials from which the pump is made. Because of their compact design and economy, they are suitable for domestic applications such as the distribution of water in combination with small pressure tanks and for irrigation, etc.

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

TECHNICAL CHARACTERISTICS

- 4" multi-stage submersible solar pumps
- High performance motor with permanent magnets
- High efficiency photovoltaic panels
PANASONIC mod. VBHN240SJ25
- Electronic control incorporated in the motor

INSTALLATION AND USE

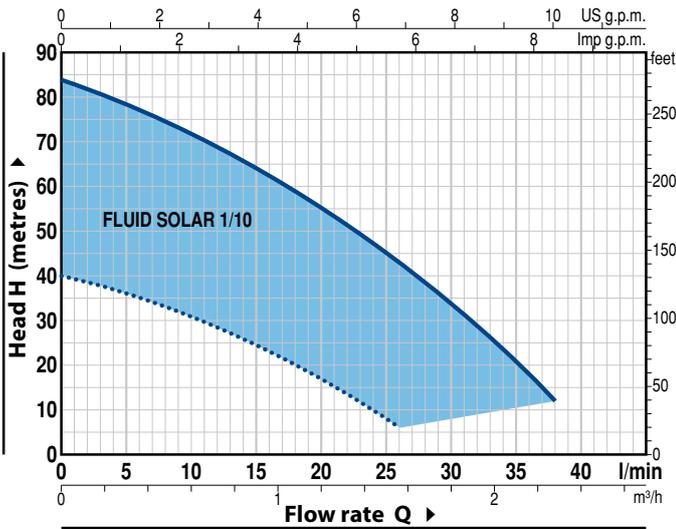

The **FLUID SOLAR** pumps have been developed to pump clean water from a well utilising energy obtained from photovoltaic panels. The electronic control incorporated into the high performance motor converts the exit voltage from the panels and regulates the velocity of rotation of the motor in order to utilise the available energy most efficiently at any one time: **on a sunny day there will be a high velocity of rotation with a raised performance of the pump, and on a cloudy day the velocity and the performance will be reduced.**

— Performance with a solar radiation of 1000 W/m² and with an available voltage of the photovoltaic panels of 100 Vdc

.... Performance with a solar radiation of 300 W/m² and with an available voltage of the photovoltaic panels of 70 Vdc

The performance curves illustrated above are obtained with the photovoltaic panels facing SOUTH (facing NORTH for installations in the southern hemisphere) and optimising the angle of inclination in relation to the horizon in compliance with the latitude of the installation site.

FLUID SOLAR

POS. COMPONENT CONSTRUCTION CHARACTERISTICS

1	DELIVERY BODY AND EXTERNAL SLEEVE	Stainless steel AISI 304 complete with threaded delivery port in compliance with ISO 228/1.
2	IMPELLERS	Lexan 141-R for FLUID SOLAR 1/10, 4/4, 4/8 Delrin 100P for FLUID SOLAR 2/6, 2/12
3	DIFFUSERS	Noryl FE1520PW
4	STAGE BOXES / STAGE LIDS	Stainless steel AISI 304
5	CABLE COVER	Stainless steel AISI 304
6	PUMP SHAFT	Stainless steel AISI 304 for FLUID SOLAR 1/10, 2/12, 4/4, 4/8
7	DRIVE COUPLING	Stainless steel AISI 316L for FLUID SOLAR 1/10, 2/12, 4/4, 4/8
8	MOTOR SHAFT	Stainless steel EN 10088-3 – 1.4104
9	MOTOR SLEEVE	Stainless steel AISI 304

10 TWO MECHANICAL SEALS SEPARATED BY AN OIL CHAMBER

Seal Model	Shaft Diameter	Position	Materials		
			Stationary ring	Rotational ring	Elastomer
STA-17	Ø 17 mm	Motor side	Silicon carbide	Graphite	NBR
ST1-16 SIC	Ø 16 mm	Pump side	Silicon carbide	Silicon carbide	NBR

11 BEARINGS 6203 2RS - C3E / 6203 ZZ - C3E

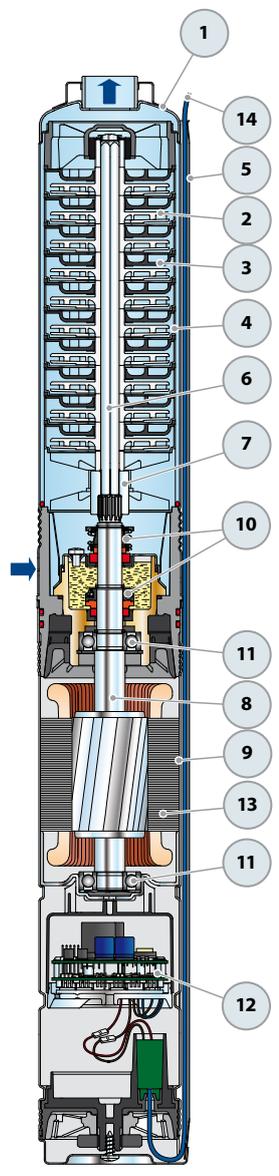

12 INVERTER

13 ELECTRIC MOTOR
Submersible PEDROLLO motor, suitable for continuous duty (with dry, rewindable stator).
FLUID SOLAR: high performance motor with permanent magnets
– Insulation: class F
– Protection: IP X8

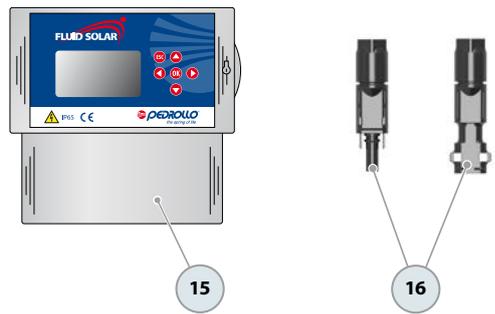

14 POWER CABLE
⇒ **PBS-P type**
approved for use in drinking water by "ACS"
in compliance with BS 6920, approval n. 04 ACCLI 201
Standard length 2 metres
Equipment supplied: connection kit for RPS2 cables

15 CONTROL BOX

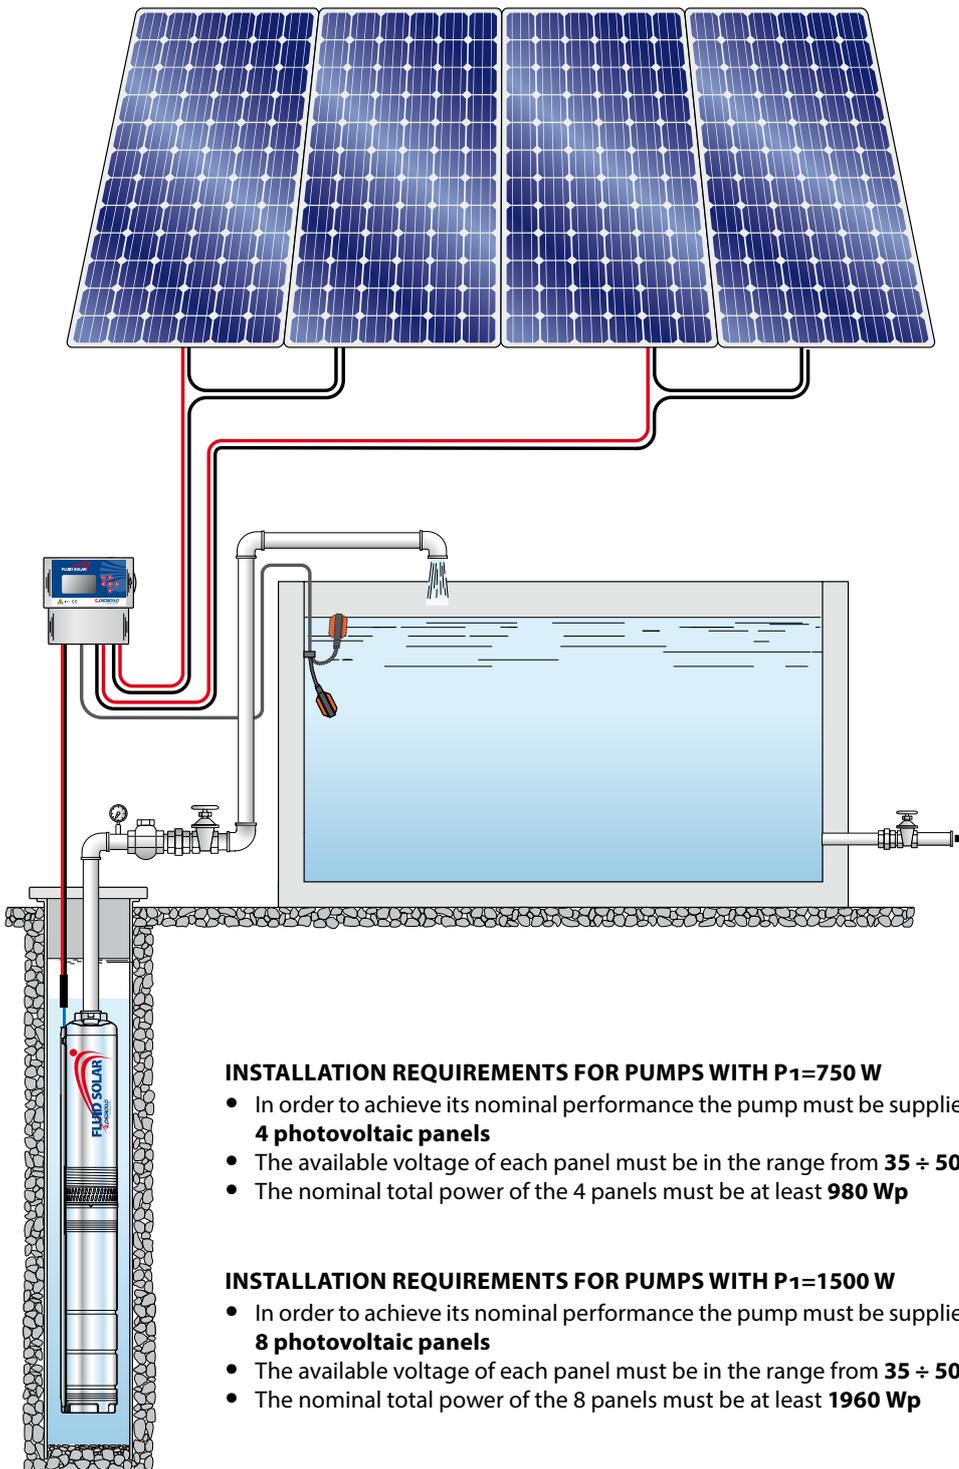

16 CONNECTORS
2 SMK male connectors
2 SMK female connectors

Equipment supplied

STANDARD INSTALLATION FOR PUMPS WITH $P_1=750\text{ W}$

INSTALLATION REQUIREMENTS FOR PUMPS WITH $P_1=750\text{ W}$

- In order to achieve its nominal performance the pump must be supplied by **4 photovoltaic panels**
- The available voltage of each panel must be in the range from **$35 \div 50\text{ V}_{DC}$**
- The nominal total power of the 4 panels must be at least **980 Wp**

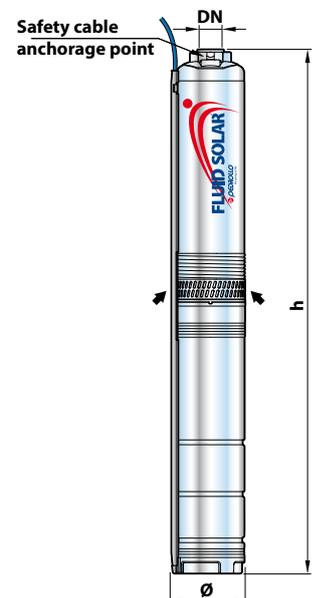

INSTALLATION REQUIREMENTS FOR PUMPS WITH $P_1=1500\text{ W}$

- In order to achieve its nominal performance the pump must be supplied by **8 photovoltaic panels**
- The available voltage of each panel must be in the range from **$35 \div 50\text{ V}_{DC}$**
- The nominal total power of the 8 panels must be at least **1960 Wp**

DIMENSIONS AND WEIGHT

FLUID SOLAR 4/4		4		614	11.5
FLUID SOLAR 4/8		8		782	17.0

(* weight of the pump with control box)

4SR

4" submersible pumps

-  Clean water
(Maximum sand content 150 g/m³)
-  Domestic use
-  Civil use
-  Industrial use

PERFORMANCE RANGE

- Flow rate up to **350 l/min** (21 m³/h)
- Head up to **405 m**

APPLICATION LIMITS

- Maximum liquid temperature **+35 °C**
- Maximum sand content **150 g/m³**
- **100 m** immersion limit
- Installation:
 - vertical
 - horizontal, with the following limits:
 - 4SR1 - 4SR1.5 - 4SR2 - 4SR4 up to **27 stages**
 - 4SR6 - 4SR8 up to **17 stages**
 - 4SR10 - 4SR12 - 4SR15 up to **12 stages**
- Starts/hour: **20** at regular intervals
- Minimum flow rate for motor cooling **8 cm/s**
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

ELECTRIC MOTOR

- Single-phase 230 V - 50 Hz
- Three-phase 400 V - 50 Hz

Length of power cable:

- for P₂ from 0.37 to 3 kW: **1.7 m** 4SR-PD, **2.0 m** 4SR-PS, **1.5 m** 4SR-FK
- for P₂ from 4 to 7.5 kW: **2.7 m** 4SR-PD, **3.0 m** 4SR-PS, **2.5 m** 4SR-FK

► The **4SR-PD** and **4SR-PS** single-phase versions supplied with a capacitor included in the packaging.

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

EU REGULATION N. 547/2012

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

Suitable for use with clean water with a sand content of no more than **150 g/m³**. Because of their high efficiency and reliability, they are suitable for use in domestic, civil and industrial applications such as for the distribution of water in combination with pressure tanks, for irrigation, for washing plants and for pressure boosting in fire-fighting sets, etc.

PATENTS - TRADE MARKS - MODELS

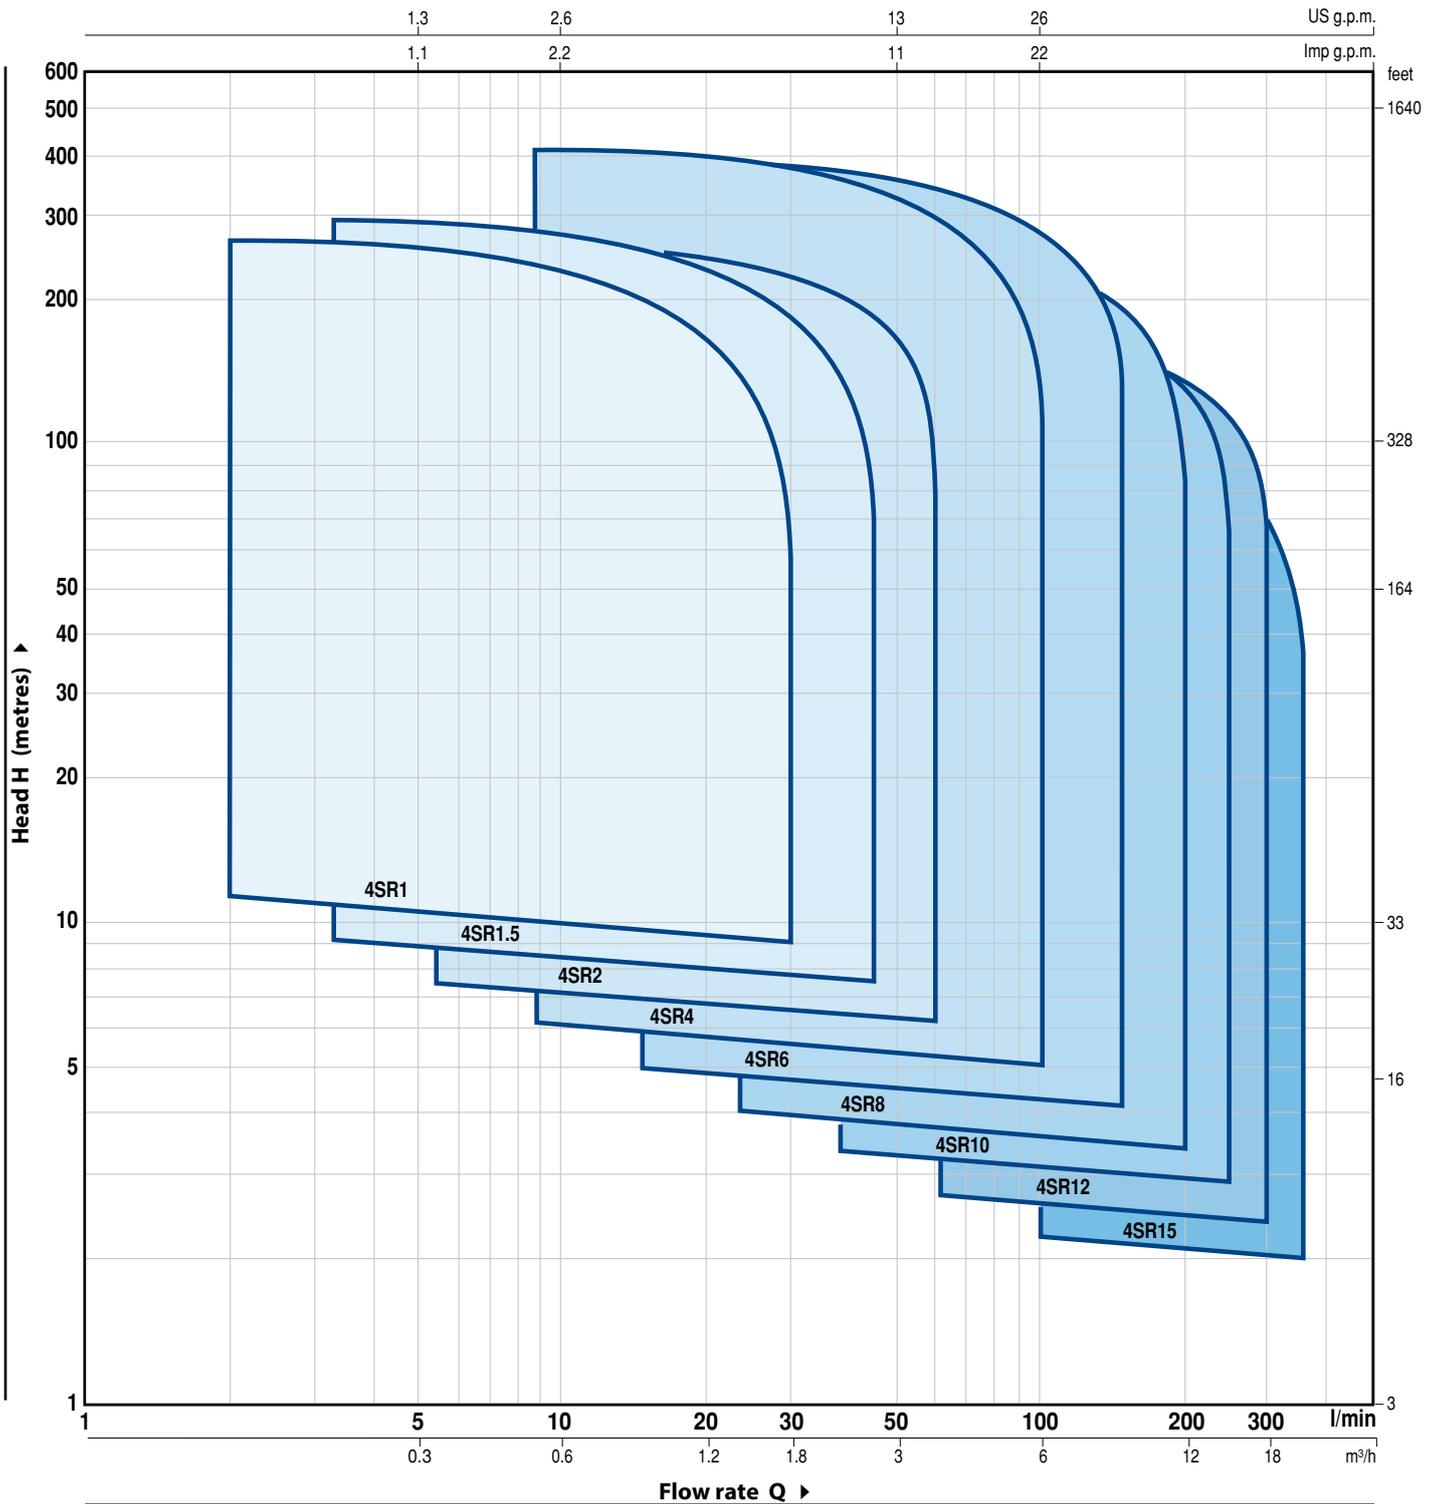

- Patent Pending n. PCT/EP2009/059855

OPTIONS AVAILABLE ON REQUEST

- Kit of cooling jacket complete with filter and supports
- Other voltages or 60 Hz frequency

PERFORMANCE RANGE

50 Hz n= 2900 rpm

NOMENCLATURE

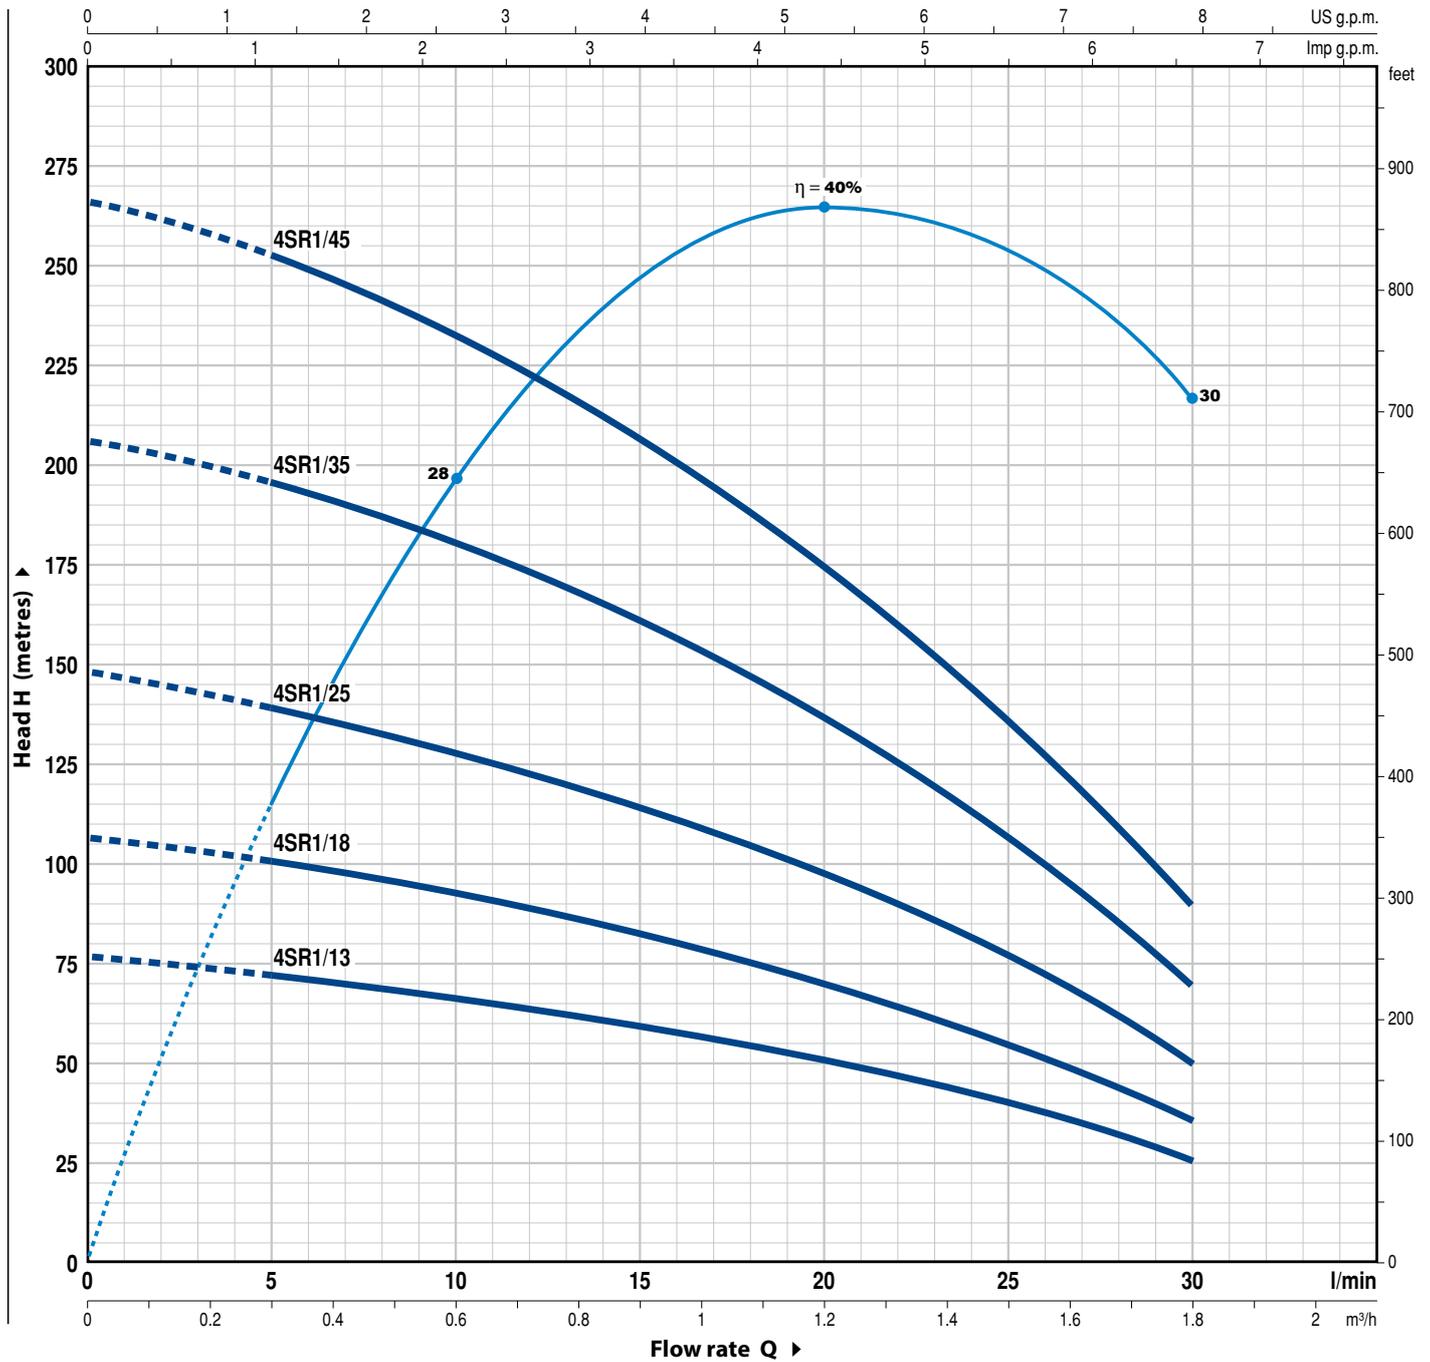

4 SR 1 m / 13 - PD or PS or FK or HYD

- Borehole diameter in inches _____
- Series _____
- Flow rate in m³/h at the point of highest efficiency _____
- Single-phase motor _____
- Number of stages _____
- PD:** pump with "4PD PEDROLLO" motor _____
- PS:** pump with "4PS PEDROLLO" motor _____
- FK:** pump with "4FK FRANKLIN" motor _____
- HYD:** pump without motor _____

POS. COMPONENT

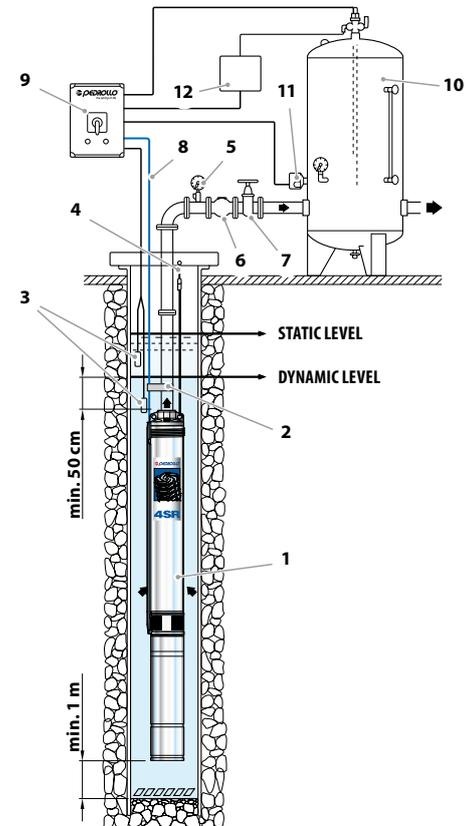

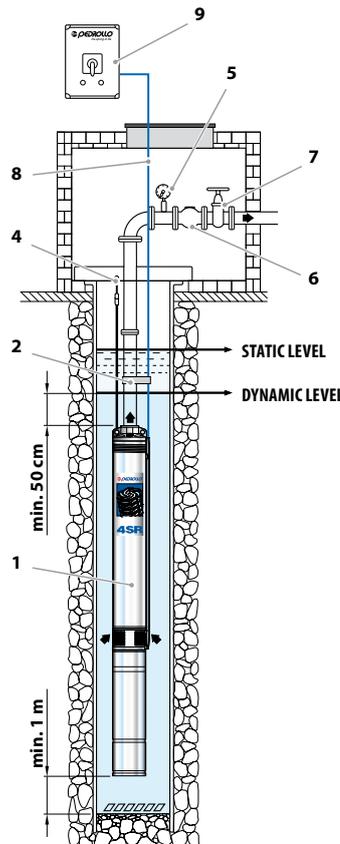

CONSTRUCTION CHARACTERISTICS

1 DELIVERY BODY	Precision cast stainless steel AISI 304 complete with threaded delivery port in compliance with ISO 228/1
2 NON-RETURN VALVE	Stainless steel AISI 304
3 MOTOR BRACKET	Stainless steel AISI 304 in compliance with NEMA standards
4 IMPELLER	Lexan 141-R for 4SR1-1.5-2-4-6-8 Noryl FE1520PW for 4SR10-12-15
5 DIFFUSER	Noryl FE1520PW
6 STAGE CASING	Stainless steel AISI 304
7 PUMP SHAFT	Stainless steel AISI 304
8 PUMP BEARINGS	Special technopolymer housing with stainless steel AISI 316, chrome oxide coated, sand resistant shaft bushing
9 DRIVE COUPLING	Stainless steel AISI 316L up to 2.2 kW; stainless steel AISI 304 for higher powers
10 FILTER	Stainless steel AISI 304
11 CABLE COVER	Stainless steel AISI 304
12 MOTOR 4"	4PD = "PEDROLLO" oil filled motor 4PS = "PEDROLLO" water filled motor 4FK = "FRANKLIN" water filled motor

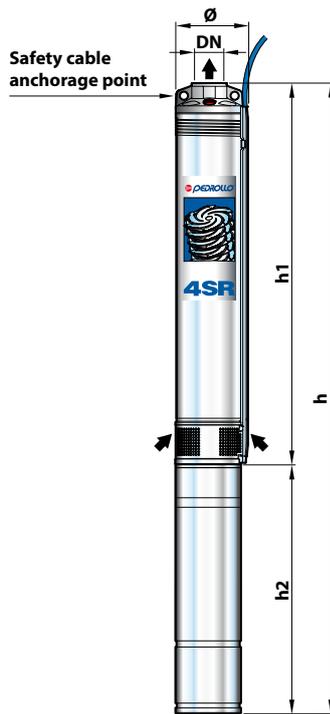

STANDARD INSTALLATION

- 1) Submersible pump
- 2) Power cable clamps
- 3) Level probes; prevent dry running
- 4) Bracket and anchorage cable
- 5) Pressure gauge
- 6) Non-return valve
- 7) Gate valve; for flow rate regulation
- 8) Power cable
- 9) Control box
- 10) Pressure vessel
- 11) Pressure switch
- 12) Electro valve/electro-compressor

➡ The **4SR** series pumps should be installed in boreholes of at least 4" (100 mm) in diameter. The pump should be lowered into the borehole, by means of the delivery pipe, to such a depth (min. 50 cm and at least one metres from the bottom) that it is completely immersed during operation when the level of water in the borehole may reduce. It is good practice to secure the pump by attaching a stainless steel cable to the anchorage points present on the delivery body.

6SR

6" submersible pump

-  Clean water
(Maximum sand content 100 g/m³)
-  Civil use
-  Agricultural use
-  Industrial use

PERFORMANCE RANGE

- Flow rate up to **1000 l/min** (60 m³/h)
- Head up to **390 m**

APPLICATION LIMITS

- Maximum liquid temperature **+35 °C**
- Maximum sand content **100 g/m³**
- **100 m** immersion limit
- Installation:
 - vertical
 - horizontal, with the following limits: up to **12 stages** or **11 kW**
- Starts/hour: **20** at regular intervals
- Minimum flow rate for motor cooling **16 cm/s** (0.5 m/s for 30 kW)
- Continuous service **S1**

CONSTRUCTION AND SAFETY STANDARDS

ELECTRIC MOTOR

– Three-phase 400 V - 50 Hz

4 m long power cable

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

EU REGULATION N. 547/2012

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

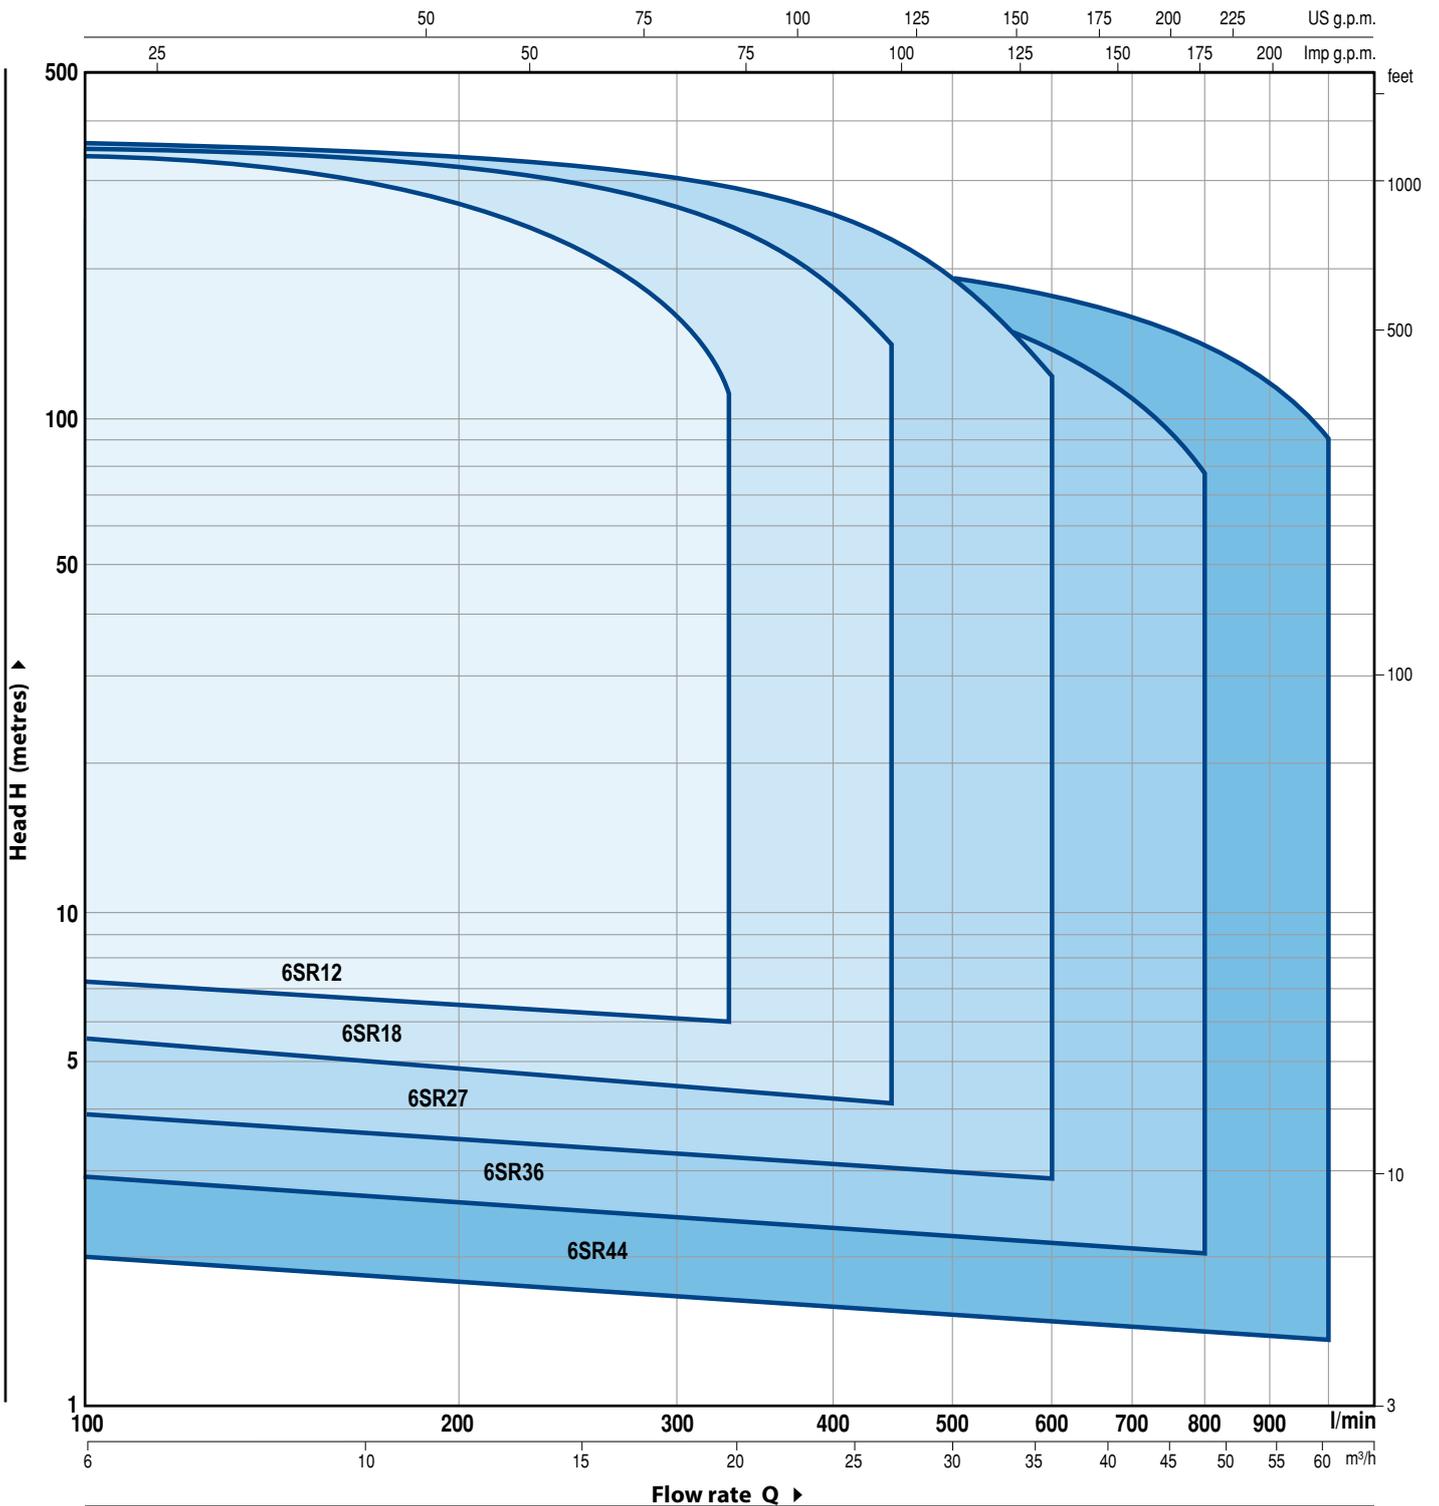

Suitable for use with clean water with a sand content of no more than 100 g/m³. Because of their high efficiency and reliability, they are suitable for use in civil, agricultural and industrial applications such as the distribution of water in combination with pressure tanks, for irrigation and for pressure boosting in fire-fighting sets, etc.

OPTIONS AVAILABLE ON REQUEST

- Kit of cooling jacket complete with filter and supports
- 6SR-HYD pumps with double cable cover suitable for dual voltage 400/690 V (star/delta) motors from 11 kW to 30 kW
- Other voltages or 60 Hz frequency

PERFORMANCE RANGE

50 Hz n = 2900 rpm

NOMENCLATURE

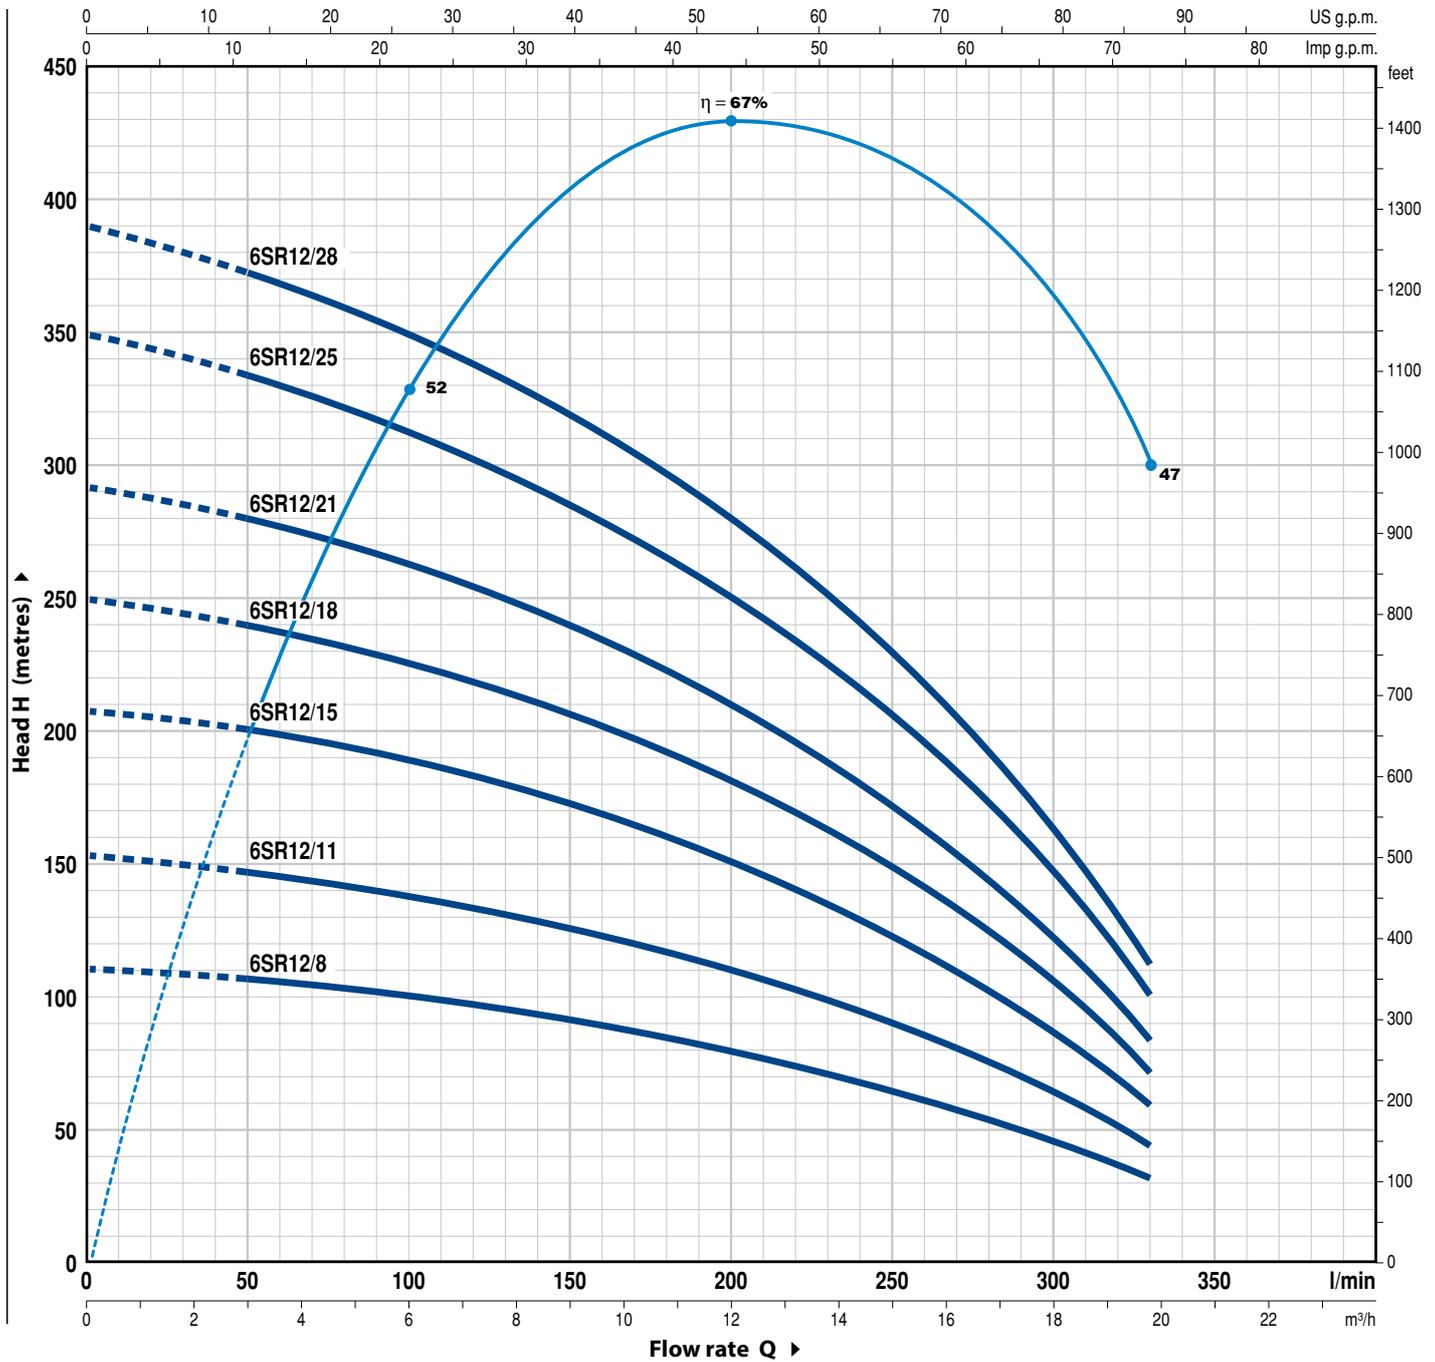

6 SR 12 / 8 - PD or HYD

- Borehole diameter in inches _____
- Series _____
- Flow rate in m³/h at the point of highest efficiency _____
- Number of stages _____
- PD:** pump with "6PD PEDROLLO" motor _____
- HYD:** pump without motor _____

6SR12

STANDARD INSTALLATION

COMPONENTS

- 1) Submersible pump
- 2) Power cable clamps
- 3) Level probes
- 4) Pump anchorage
- 5) Pressure gauge
- 6) Non-return valve
- 7) Gate valve; for flow rate regulation
- 8) Power cable
- 9) Control box
- 10) Pressure tank
- 11) Pressure switch
- 12) Electro valve/electro-compressor

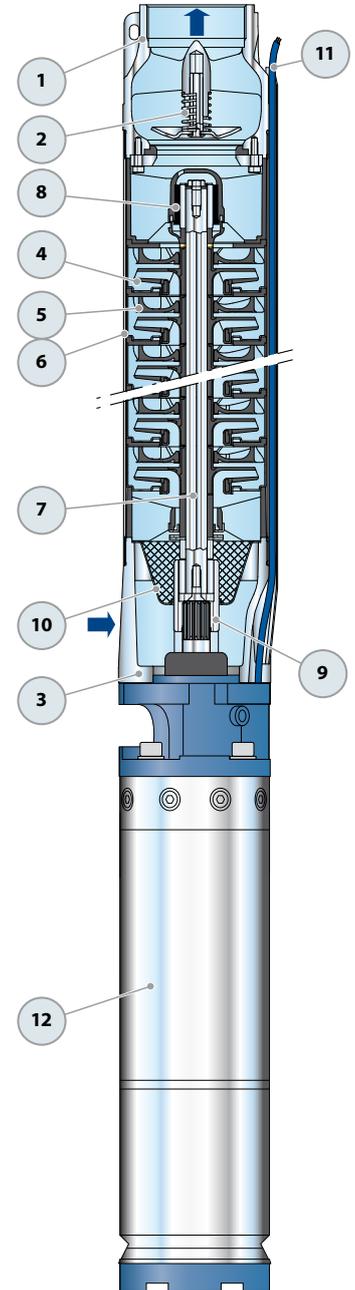

Cooling jacket

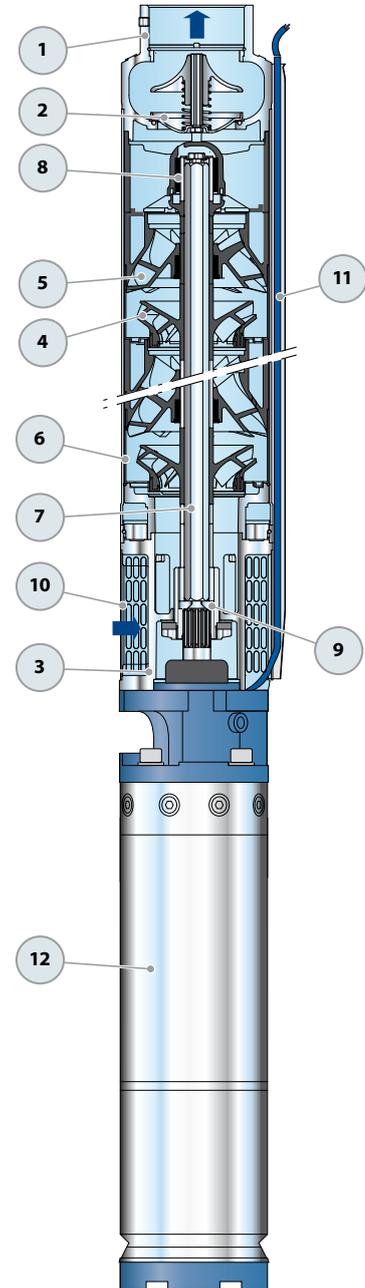

When the pump is installed in storage tanks, rivers or lakes an external jacket must be fitted to establish a flow of cooling water to prevent overheating of the motor.

➡ The **6SR** series pumps should be installed in boreholes of at least 6" (150 mm) in diameter. The pump should be lowered into the borehole, by means of the delivery pipe, to such a depth (min. 50 cm and at least one metres from the bottom) that it is completely immersed during operation when the level of water in the borehole may reduce. It is good practice to secure the pump by attaching a stainless steel cable to the anchorage points present on the delivery body.

POS. COMPONENT	CONSTRUCTION CHARACTERISTICS
1 DELIVERY BODY	Nickel-plated cast iron complete with threaded delivery port in compliance with ISO 228/1
2 NON-RETURN VALVE	Stainless steel AISI 304
3 MOTOR BRACKET	Nickel-plated cast iron in compliance with NEMA standards
4 IMPELLERS	Special-rubber coated Noryl FE1520PW
5 DIFFUSERS	Noryl FE1520PW
6 DIFFUSOR CASING	Stainless steel AISI 304
7 PUMP SHAFT	Stainless steel AISI 304
8 PUMP BEARINGS	Elastomer housing with stainless steel AISI 316, chrome oxide coated, sand resistant shaft bushing
9 DRIVE COUPLING	Stainless steel AISI 420
10 FILTER	Stainless steel AISI 304
11 CABLE COVER	Stainless steel AISI 304
12 MOTOR 6"	6PD = "PEDROLLO" oil filled rewindable motor

4PD

4" PEDROLLO submersible motors

 Domestic use

 Civil use

 Industrial use

PERFORMANCE

- Power from **0.37 to 7.5 kW**

APPLICATION LIMITS

- Maximum liquid temperature **+35 °C**
- **100 m** immersion limit
- Starts/hour: **20** at regular intervals
- Minimum flow rate for motor cooling **8 cm/s**
- Continuous service **S1**

ELECTRIC MOTOR

- 2 pole electric motor, 50 Hz (n ~ 2900 rpm)
- Voltage:
 - single-phase **230 V**
 - three-phase **400 V**
- Insulation: class F
- Protection: IP 68

EN 60034-1
IEC 60034-1
CEI 2-3

CONSTRUCTION AND SAFETY STANDARDS

- Oil filled **rewindable** motors (non-toxic oil for use with food)
- **Jacket: AISI 316 stainless steel**
- **Shaft: "DUPLEX" stainless steel**
- Dimensions of the flange connection in compliance with **NEMA** standards.

Complete with power cable of the following length:

- **1.7 m** powers from 0.37 to 3 kW
- **2.7 m** powers from 4 to 7.5 kW.

⇒ **Single-phase versions supplied with a capacitor included in the packaging.**

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

OPTIONS AVAILABLE ON REQUEST

- Other voltages or 60 Hz frequency

SACRIFICIAL ANODE

(Supplied on request - code ASS4PDA01)

- Manufactured with a special zinc-aluminium cadmium-free alloy, suitable for contact with drinking water.
- It is easily fitted to the lower extremity of 4PD motors to protect them from corrosion in the presence of irregular currents or particularly aggressive waters, greatly increasing the life of the motor component.

INSTALLATION AND USE

TOP MULTI® pumps are recommended for pumping **clean water** and liquids that are not chemically aggressive for the materials from which the pump is made.

Because of their high efficiency and reliability they are suitable for use in applications such as domestic water supply from reservoirs, tanks or relatively deep wells, for drawing rain water from cisterns to water gardens or for use in irrigation systems, etc.

INSTALLATION AND USE

The **TOP** series is suitable for use with **clear water** that does not contain abrasive particles.

Because of the design solutions that have been adopted, such as the complete cooling of the motor and the shaft with double seal, these pumps are easy to use and reliable.

They are suitable for use in applications such as draining small flooded areas (rooms, cellars, garages) in the event of an emergency, for the disposal of waste water in the home (from dishwashers, washing machines) and for emptying drainage traps.

INSTALLATION AND USE

The **TOP-VORTEX** pump is suitable for use with **dirty water** that is not chemically aggressive towards the materials from which the pump is made.

Because of the design solutions that have been adopted, such as the complete cooling of the motor and the shaft with double seal, these pumps are easy to use and reliable.

They are suitable for use in applications such as clearing dirty water, emptying tanks, discharging domestic waste water, and for emptying collection traps containing suspended solids up to a maximum of Ø 20 mm.

PATENTS - TRADE MARKS - MODELS

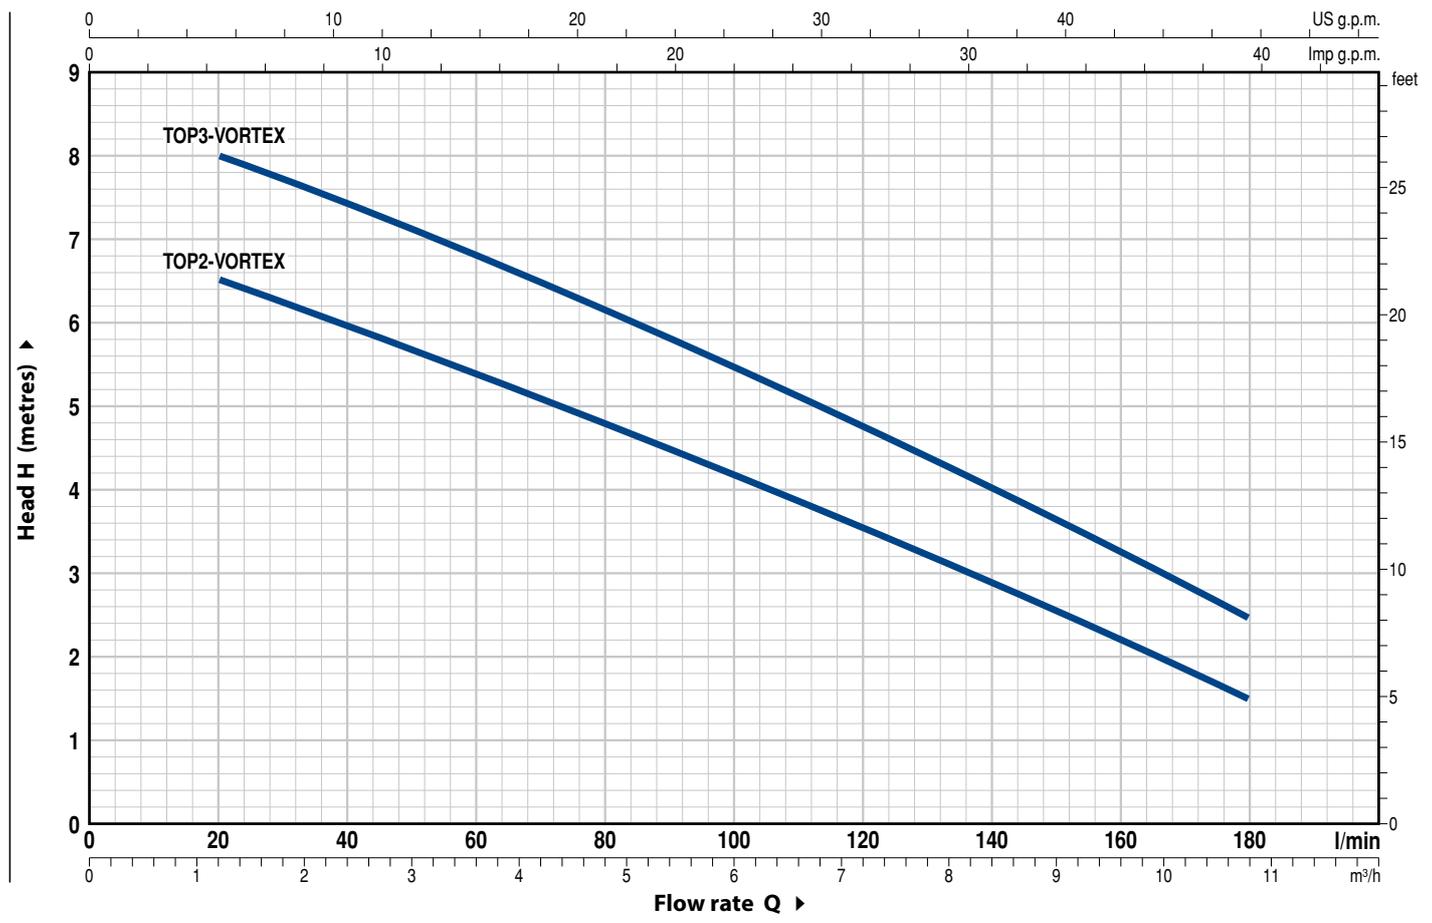

- Registered EU Design n. 342159-0011

OPTIONS AVAILABLE ON REQUEST

- “**TOP-VORTEX/GM**” pumps with vertical switch (suitable for particularly small wells)
- Special mechanical seal
- Pumps with a **10 m** long power cable.
 ➔ N.B.: Standard EN 60335-2-41 states that the power cable must be 10 m long for outdoor applications
- Pumps without float switch
- Other voltages or 60 Hz frequency

INSTALLATION AND USE

The **RX** series pumps are suitable for use with **clear water** that does not contain abrasive particles.

Because of the design solutions that have been adopted, such as the complete cooling of the motor and the shaft with double seal, these pumps are easy to use and reliable.

They are suitable for use in fixed installations and applications such as draining small flooded areas (rooms, cellars, garages) in the event of an emergency, for the disposal of waste water in the home (from dishwashers, washing machines) and for emptying drainage traps.

ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

ZX series pumps are suitable for draining **dirty water** in domestic applications and for pumping dirty water containing suspended solids up to Ø 40 mm. They distinguish themselves for the ease with which they are installed and their reliability under automatic operating conditions in fixed installations.

OPTIONS AVAILABLE ON REQUEST

- Pumps with a **10 m** long power cable.
 - ➔ N.B.: Standard EN 60335-2-41 states that the power cable must be 10 m long for outdoor applications
- Single-phase pumps without float switch
- Other voltages or 60 Hz frequency

INSTALLATION AND USE

BC-ST submersible pumps in stainless steel are recommended for draining **dirty and filthy water** in domestic, civil and industrial applications. They come equipped with a **DOUBLE-CHANNEL** impeller and are capable of pumping liquids containing short fibred suspended solids up to Ø 50 mm. They are ideal for pumping sewage, waste water, surface water and water mixed with mud in locations such as blocks of flats and detached houses. These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations.

INSTALLATION AND USE

BC-MF submersible pumps are recommended for draining **dirty and filthy water** in domestic, civil and industrial applications. They come equipped with a **DOUBLE-CHANNEL** impeller and are capable of pumping liquids containing short fibred suspended solids up to Ø 50 mm. They are ideal for pumping sewage, waste water, surface water and water mixed with mud in locations such as blocks of flats and detached house.

These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations.

INSTALLATION AND USE

VX pumps are recommended for domestic, civil and industrial applications in all cases where the water contains suspended solids up to Ø 50 mm, for example **groundwater, surface water, filthy and dirty water**.

They are for example suitable for draining flooded areas such as cellars, underground car parks, car washes, for emptying cesspools and for sewage disposal.

These pumps distinguish themselves for their reliability, which can be best appreciated under automatic operating conditions in fixed installations.

Submersible pumps

-  Filthy water
-  Domestic use
-  Civil use

PERFORMANCE RANGE

- Flow rate up to **650 l/min** (39 m³/h)
- Head up to **14 m**

APPLICATION LIMITS

- **10 m** maximum immersion depth (with a sufficiently long power cable)
- Maximum liquid temperature **+40 °C**
- Passage of solids:
 - up to **Ø 40 mm** for VXC /35-N
 - up to **Ø 50 mm** for VXC /45-N
- Minimum immersion depth for continuous service:
 - **280 mm** for VXC /35-N
 - **300 mm** for VXC /45-N

CONSTRUCTION AND SAFETY STANDARDS

- **10 m** long power cable
- Float switch for single-phase versions

INSTALLATION AND USE

MC series pumps, made from heavy gauge cast iron offering exceptional sturdiness, abrasion resistance and durability, come equipped with a **DOUBLE-CHANNEL** impeller and are capable of pumping liquids containing short fibred suspended solids up to Ø 50 mm.

Recommended for conveying **drained water and sewage, waste water, water mixed with mud, groundwater and surface water** for applications in blocks of flats, industries, multi-storey and underground car parks, wash areas, etc.

INSTALLATION AND USE

The **TRITUS** series of grinder pumps manufactured from heavy gauge robust cast iron, resistant to abrasion and long-lasting, are fitted with a **GRINDER in tempered stainless steel of great resistance** which completely grinds up solid bodies and fibres in waste and reflux water from domestic and civil applications and conveys it under pressure into the sewers through small diameter pipes.

Submersible pumps

-  Filthy water
-  Domestic use
-  Civil use
-  Industrial use

PERFORMANCE RANGE

- Flow rate up to **1200 l/min** (72 m³/h)
- Head up to **16 m**

APPLICATION LIMITS

- **10 m** maximum immersion depth (with a sufficiently long power cable)
- Maximum liquid temperature **+40 °C**
- Passage of solids:
 - up to **Ø 50 mm** for VXC /50
 - up to **Ø 70 mm** for VXC /70
- Minimum immersion depth for continuous service:
 - **390 mm** for VXC /50
 - **430 mm** for VXC /70

CONSTRUCTION AND SAFETY STANDARDS

- **10 m** long power cable
- External float switch and control box for single-phase versions

INSTALLATION AND USE

The **VXC** series of pumps, manufactured from heavy gauge robust cast iron, resistant to abrasion and long-lasting, are fitted with a VORTEX impeller and are therefore suitable for draining **dirty, filthy and reflux water, and water mixed with putrid mud**. They are suitable for installation in sewers, tunnels, excavations, canals, underground car parks, etc.

PATENTS - TRADE MARKS - MODELS

INSTALLATION AND USE

MC series pumps, made from heavy gauge robust cast iron, resistant to abrasion and long-lasting, are fitted with a **DOUBLE-CHANNEL** impeller and are capable of pumping liquids containing short fibred suspended solids. They are ideal for pumping **sewage, waste water, water mixed with mud, groundwater and surface water** in locations such as blocks of flats, public buildings, factories, multi-storey and underground car parks, washing areas, etc.

VXCm 30/50-70-F	60 µF 450 VL

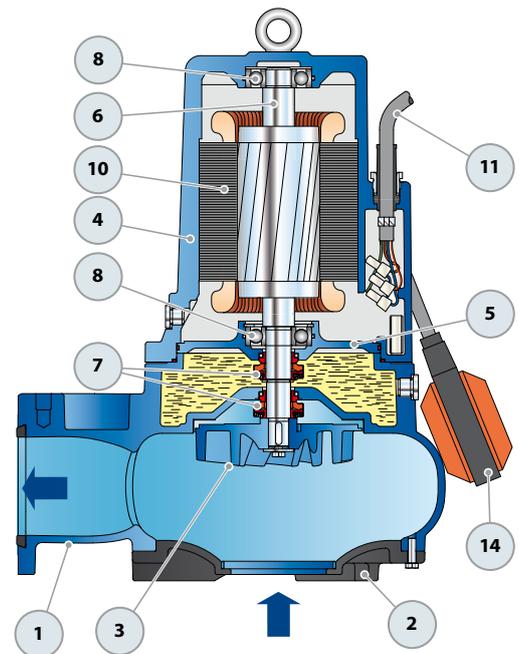

10 ELECTRIC MOTOR

VXCm 15-20-F: single-phase 230 V - 50 Hz with thermal overload protector incorporated into the winding

⇒ **VXCm 30-F:** single-phase 230 V - 50 Hz with thermal overload protector incorporated into the winding to be connected to the control box

⇒ **VXC-F:** three-phase 400 V - 50 Hz with thermal overload protector incorporated into the winding to be connected to the control box (supplied on demand)

- Insulation: class F
- Protection: IP X8

11 POWER CABLE

10 metres long "H07 RN-F" cable

12 CONTROL BOX per VXCm 15-20-F

(only for single-phase versions)

Complete with capacitor and manual reset motor protector

13 CONTROL BOX per VXCm 30-F

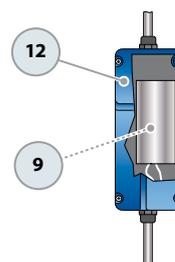

(only for single-phase versions)

QES 300 MONO series

14 FLOAT SWITCH

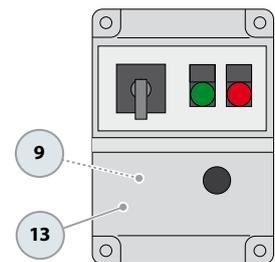

(only for single-phase versions)

Standard features

Control box for VXCm 15-20-F (HP 1.5-2.0) (only for single-phase versions)

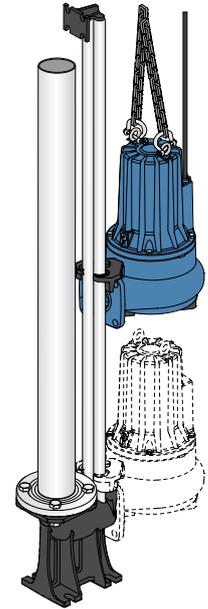

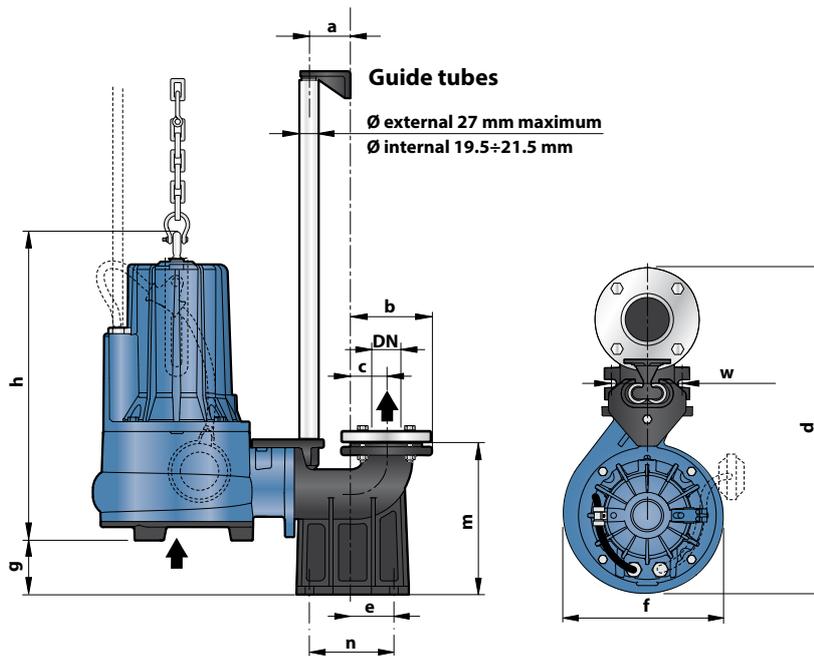

Standard features

Control box for VXC 30-F (HP 3.0) (only for single-phase versions)

Submersible pumps

-  Filthy water
-  Domestic use
-  Civil use
-  Industrial use

PERFORMANCE RANGE

- Flow rate up to **1600 l/min** (96 m³/h)
- Head up to **25 m**

APPLICATION LIMITS

- **10 m** maximum immersion depth (with a sufficiently long power cable)
- Maximum liquid temperature **+40 °C**
- Passage of solids:
 - up to **Ø 50 mm** for MC /50-F
 - up to **Ø 70 mm** for MC /70-F
- Minimum immersion depth for continuous service:
 - **390 mm** for MC /50-F
 - **440 mm** for MC /70-F

CONSTRUCTION AND SAFETY STANDARDS

- **10 m** long power cable
- External float switch and control box for single-phase versions

EN 60335-1
IEC 60335-1
CEI 61-150

EN 60034-1
IEC 60034-1
CEI 2-3

CERTIFICATIONS

Company with management system certified DNV
ISO 9001: QUALITY
ISO 14001: ENVIRONMENT AND SAFETY

INSTALLATION AND USE

The **MC-F** series of pumps, manufactured from heavy gauge robust cast iron, resistant to abrasion and long lasting, are fitted with a **DOUBLE CHANNEL** impeller in stainless steel which allows the drainage of liquids with short fibre solids in suspension. They are suitable for carrying **discharged and sewer water, dirty water, water mixed with mud, groundwater** and surface water, for applications, when placed in suitable wells, in blocks of flats, public buildings, industries, multi-storey and underground car parks and wash areas.

OPTIONS AVAILABLE ON REQUEST

- Connection support KIT for PMC
- **QES** control box for three-phase pumps
- Single-phase pumps without float switch
- Other voltages or 60 Hz frequency

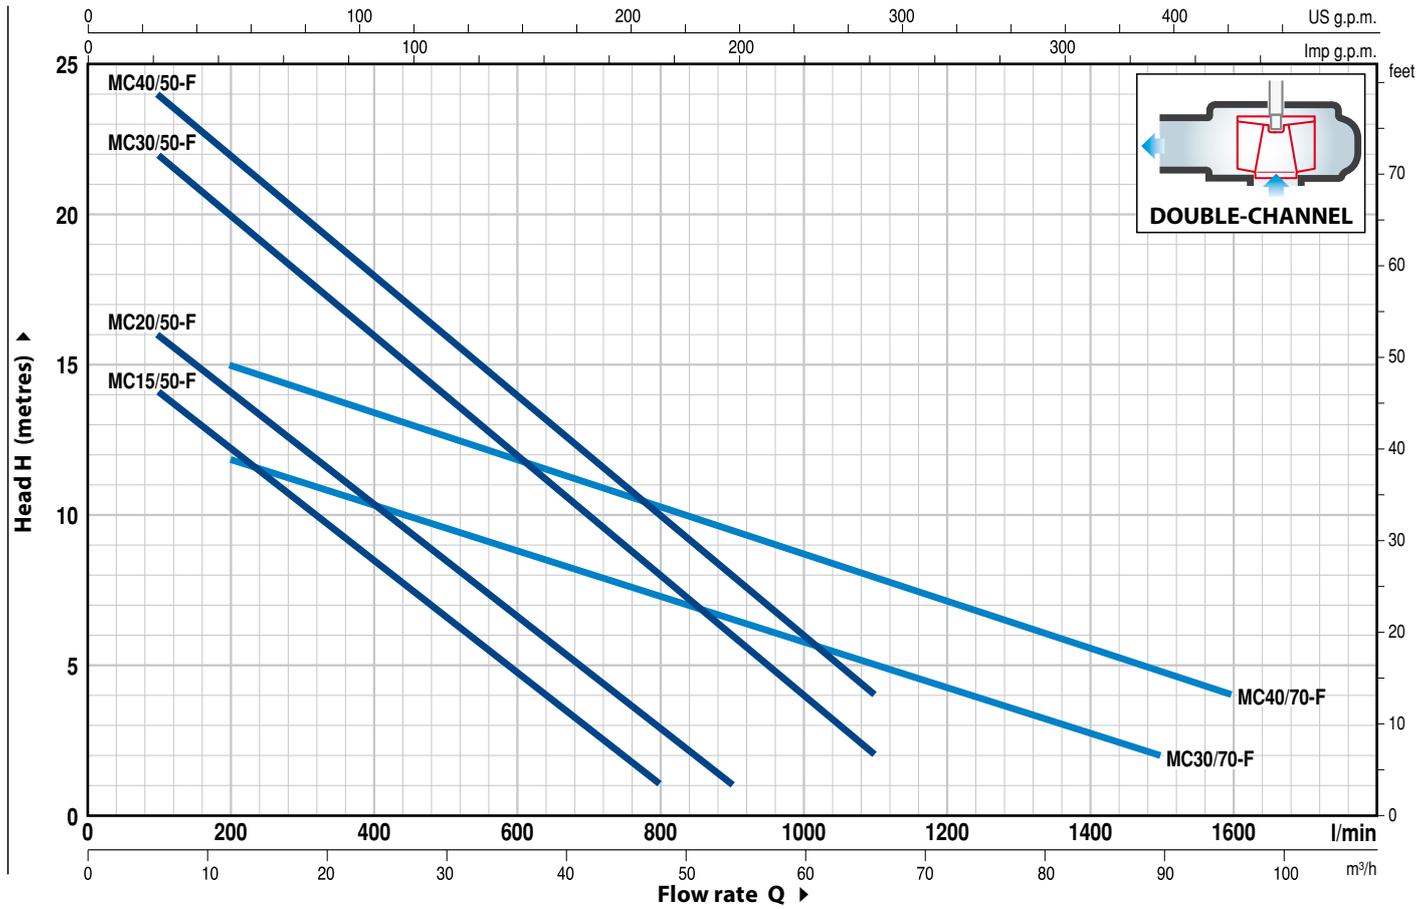

GUARANTEE

➔ **For the following versions the incorporated thermal overload protector must be connected to the control box for the guarantee to be considered valid:**

- | | |
|----------------------|------------------------------|
| single-phase | three-phase |
| – MCm 30/50-F | – MC 15-20-30-40/50-F |
| – MCm 30/70-F | – MC 30-40/70-F |

PLUG & DRAIN

Emergency KIT for emptying or preventing floods

 Domestic use

PLUG & DRAIN is the indispensable and practical emergency kit for tackling flooding in garages, cellars and basements with efficacy and speed.

Thanks to the versatile drainage pump and the 15 metres long PVC hose it is possible to swiftly drain the flooded area, if necessary using the plastic crate as a filter.

With **PLUG & DRAIN** you can completely drain the area affected by flooding: the pump can in fact suck up water down to a level of only 2 mm from the bottom.

With **PLUG & DRAIN** you have everything you require ready for use:

- pump with a ready-fitted connector, a 10 metres long power cable with Schuko plug and an external float switch;
- PVC hose with a rapid connector;
- Crate-filter to prevent possible bulky residues blocking water drainage.

TYPICAL USE

In the case of flooded premises place **PLUG & DRAIN** on the floor, attach the flat hose to the pump by means of the rapid connector, plug into the electricity network and empty the water through the hose. The plastic crate will act as a filter, making it possible to drain down to a level of about 2 cm from the bottom.

In order to drain the residual water disconnect the pump from the crate and place it on the floor. The pump will be able to drain down to a level of only 2 mm from the bottom.

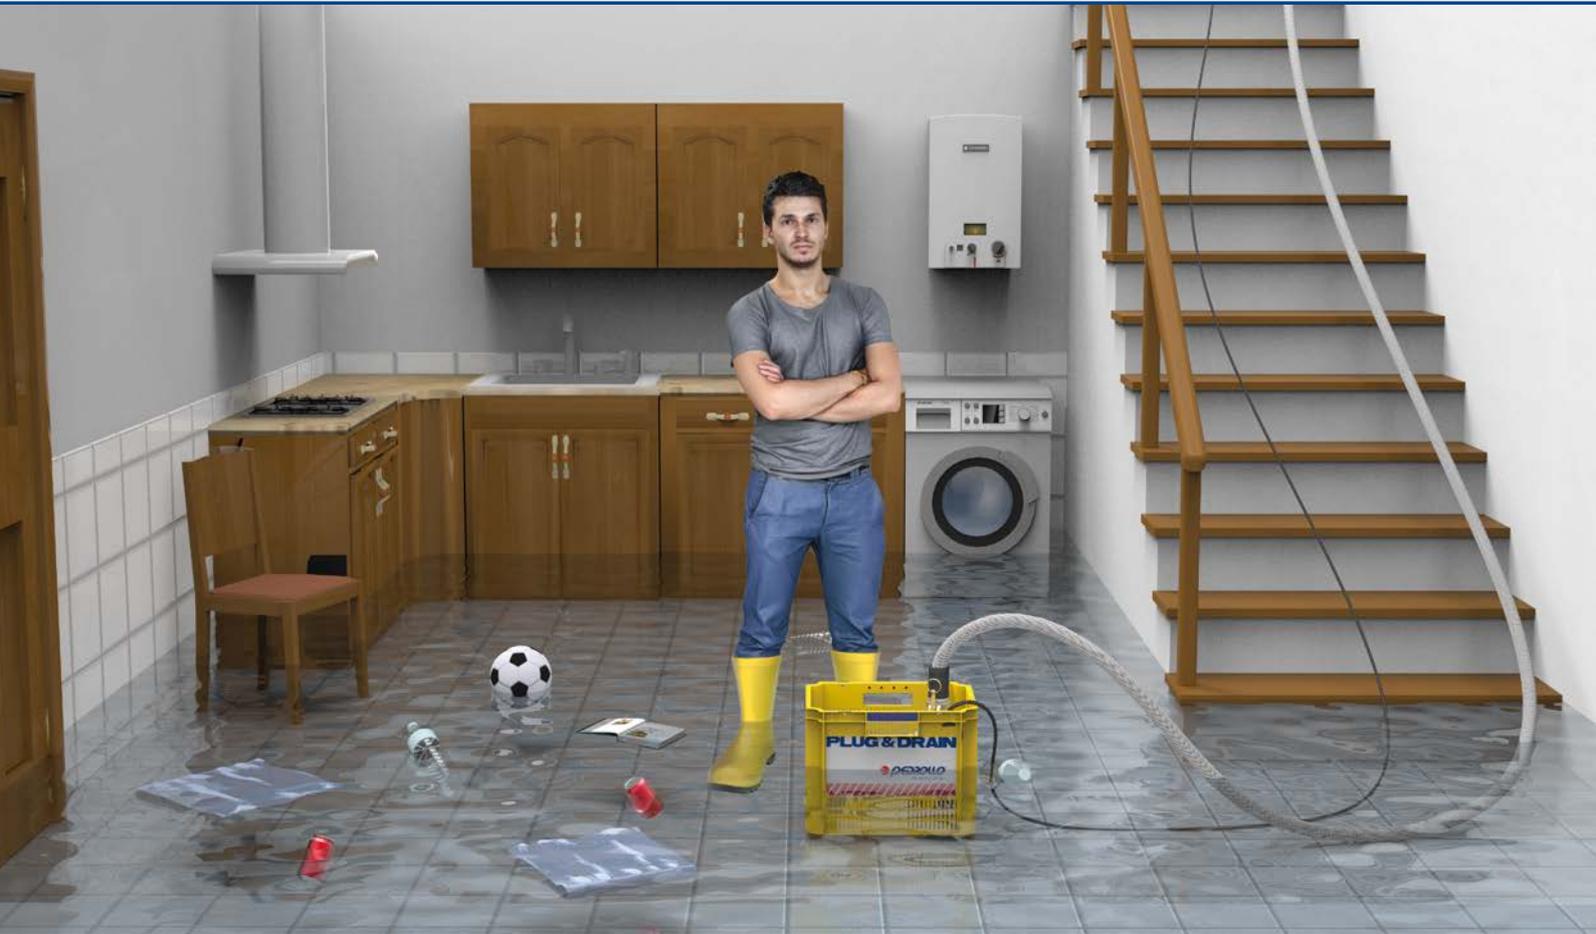

PLUG & DRAIN also has the advantage that it can be stored on a shelf so as to have everything necessary in order and ready for use.

DIMENSIONS AND WEIGHTS

TYPE	DIMENSIONS mm			kg*
	a	b	h	
PLUG & DRAIN	400	300	320	9.3

(* Overall weight: pump, hose, connectors and crate)

COMPONENTS

SUBMERSIBLE TOP2-FLOOR PUMP

- Single-phase **230 V - 50 Hz**
- Thermal overload protector incorporated in the winding
- **10 metres** power cable fitted with Schuko plug
- External float switch
- "CAMLOCK" rapid connection
- Performance:
 - **H max= 9 m**
 - **Q max= 160 l/min**
- Emptying level down to **2 mm** from the bottom

PVC HOSE

- "CAMLOCK" rapid connection
- Length of tube **15 m**
- Diameter of tube **1 1/4"**

CRATE-FILTER

- Complete with a system for fixing the pump for a stable operation and an easy detachment for use of the pump without the crate-filter
- Complete with a lid so as to put away **PLUG & DRAIN** in order and have it always ready for use

COMPONENTS:

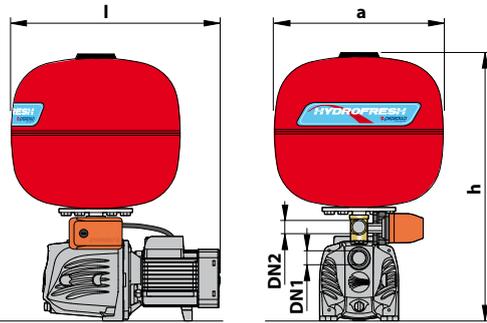

- Single-phase pump
- Tank
- Pressure switch PSG-1
- Pressure gauge (for 24SF, 24CL and 60CL)
- Hose (for 24CL and 60CL)
- Brass connector
- 1.5 m power cable with Schuko plug

- (1) Maximum flow rate at the minimum recommended pressure switch pressure
 (2) Recommended pressure range

COMBIPRESS "CB2"

Pressure boosting sets

 Domestic use

 Agricultural use

 Civil use

 Industrial use

CB2 - MK

CB2 - 2CP

CB2 - 2CP

OPERATING PRINCIPLE

COMBIPRESS are pressure boosting sets consisting of two pumps assembled in a ready to be mounted unit.

The sets are arranged so that, at each increase in demand by the users, one or both pumps in succession start automatically. The operation of the number of pumps necessary to satisfy the demand for water results in a marked reduction in power consumption.

The electronic circuit in the control box alternates the operation of the pumps.

USES

- Clean water and chemically non-aggressive liquids.
- Water supply: pressure boosting in industrial applications, blocks of flats, hotels, communities, water treatment plants, campsites, schools, hospitals, barracks, etc.
- Irrigation: playing fields in general (football, golf, etc), agriculture, artificial snow systems.

CONSTRUCTION CHARACTERISTICS

- **PUMPS** complete with intake and exhaust manifolds, spherical valves and non-return valves.
- **BLOCK** constructed from a metal section.
- **COMPONENTS** of command and control installed on the exhaust manifold and consisting of a pressure gauge and two pressure switches which can be set by the user (the factory setting is regulated based on the average use of the set).
- **CONTROL BOX** fitted with a gate block switch, a low voltage pressure switch control circuit, an electronic circuit to alternate the operation of the pumps, an amperometric protection (overload cut-out) and an anti-rebound system at the start of the pumps (to avoid continuous false starts in the case of short and limited requests by the user).

CB2m: single-phase 230 V - 50 Hz.

CB2: three-phase 230/400 V - 50 Hz up to 4 kW.

400/690 V - 50 Hz from 5.5 to 7.5 kW.

PUMPS WITH EASYPRESS 2

MODEL Single-phase	POWER (P ₂)	
	kW	HP
2CP series pumps		
2CPm 25/14B - EP 2	1.1	1.5
JSW series pumps		
JSWm 2A - EP 2	1.1	1.5

→ EASYPRESS 2 for 1.5 HP pumps (1.1 kW)

EASYPUMP COMPONENTS:

- Single-phase pump
- EASYPRESS with pressure gauge
- GSR quick-fit joint
- 1.5 metres power cable with Schuko plug

EASYPUMP

Small pumps fitted with an electronic pressure switch that starts and stops the pump as required when a tap is turned on or off. The pump is also protected against dry running.

EASYPRESS®

Electronic pressure regulators

 Domestic use

PERFORMANCE RANGE

- Max flow rate: **200 l/min** (12 m³/h)
- Working pressure: **10 bar**
- Restarting pressure: **1.5 bar** ●

APPLICATION LIMITS

- Maximum liquid temperature **+65 °C**
- Ambient temperature up to **+40 °C**
- Burst pressure **> 40 bar**
- Protection: **IP 65**
- Voltage: **230 V** - Frequency: **50/60 Hz**
- Max current: – **10 A** EASYPRESS-1
– **16 A** EASYPRESS-2

CONSTRUCTION AND SAFETY STANDARDS

- Resinated and easily replaced electronic card for complete protection from humidity, fitted in the case with an IP 65 protection.
- The electronic card inside EASYPRESS has undergone the strictest EMC tests of electromagnetic compatibility.

INSTALLATION AND USE

The EASYPRESS series consists of electronic devices designed to start (when a tap is turned on) and stop (when a tap is turned off) single-phase pumps.

A **microprocessor protects** the pump from dry running, and allows the pump to be restarted either automatically or manually. It also prevents the pump from starting too often when small leaks are present within an installation.

PATENTS - TRADE MARKS - MODELS

- Registered EU Design n. 868062
- Patent n. IT 1388969, IT 1388970
- EASYPRESS® registered Trade Mark n. 0001334481

OPTIONS AVAILABLE ON REQUEST

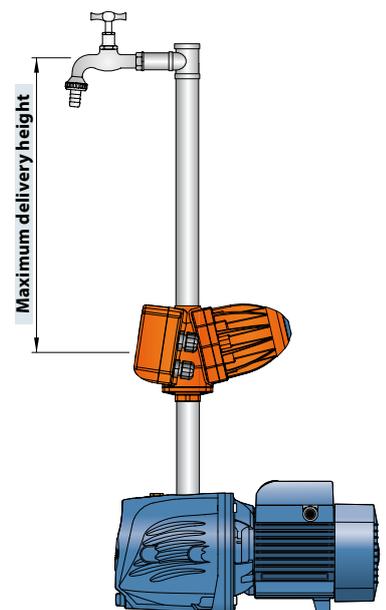

- EASYPRESS-1 version with restarting pressure **0.8 bar** ●
- EASYPRESS-2 version with restarting pressure **2.2 bar** ●
- Version with 1" NPT
- Version with cable and Schuko plug and socket
- Version with pressure gauge

STARTING PRESSURE

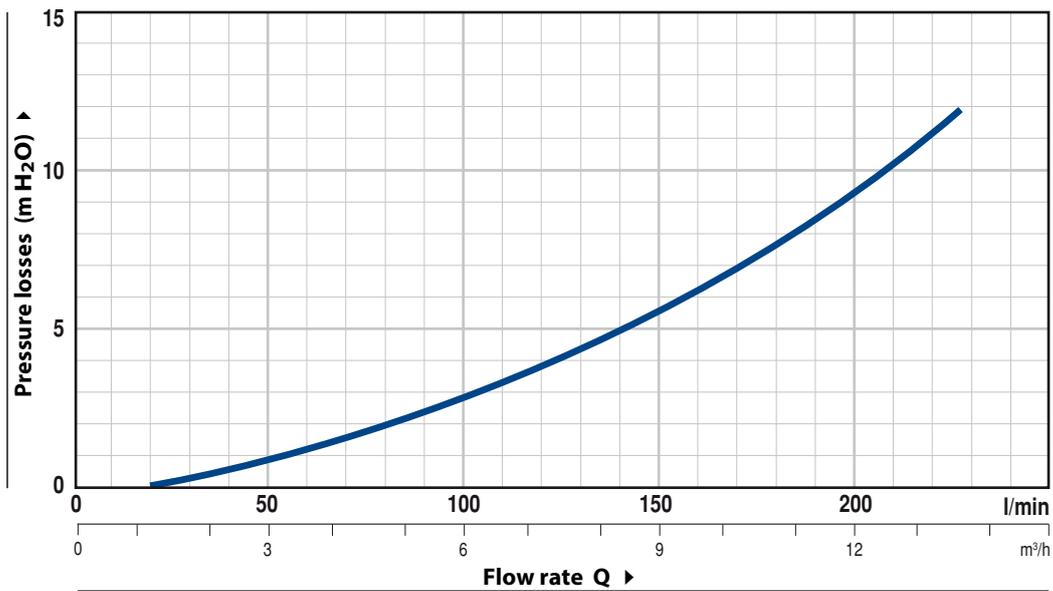

There are three different models available, each with a different starting pressure and easily identified by the coloured cap positioned at the rear of the EASYPRESS, for installations requiring delivery at various heights.

Maximum delivery height

- 2.2 bar version ● = **18 m**
- 1.5 bar version ● = **11 m**
- 0.8 bar version ● = **5 m**

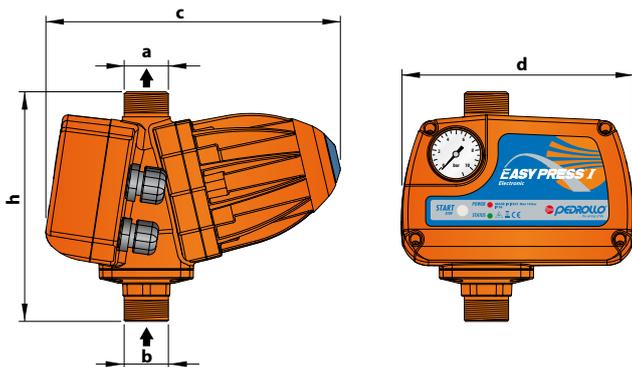

PRESSURE LOSSES

MODEL	POWER (P ₂)		Volt	Hz	Current	Fittings	Flow rate	Restarting pressure
	kW	HP						
EASYPRESS-1	0.75	1	230	50/60	10 A	1" x 1"	12 m ³ /h	1.5 bar
EASYPRESS-2	1.5	2	230	50/60	16 A	1" x 1"	12 m ³ /h	1.5 bar

DIMENSIONS AND WEIGHT

MODEL	PORTS		DIMENSIONS mm			kg
	a	b	c	d	h	
EASYPRESS 1-2	1"	1"	221	174	174	1.63

ACCESSORIES

- GSR Special three-piece joint with an o-ring seal (1" M)

PALLETIZATION

MODEL	
Single-phase	n. EASYPRESS
EASYPRESS 1-2	147

PERFORMANCE RANGE

- Max flow rate: **200 l/min** (12 m³/h)
- Working pressure: **10 bar**
- Restarting pressure: **1.5 bar**

APPLICATION LIMITS

- Maximum liquid temperature **+50 °C**
- Ambient temperature up to **+40 °C**
- Burst pressure **40 bar**
- Protection: **IP 65**
- Voltage: **230 V** - Frequency: **50/60 Hz**
- Max current:
 - **12 A** EASYSMALL-1
 - **16 A** EASYSMALL-2

PERFORMANCE DATA

MODEL	POWER (P ₂)		Volt	Hz	Current
	kW	HP			
Single-phase					
EASYSMALL-1	0.75	1	230	50/60	12 A
EASYSMALL-2	1.5	2	230	50/60	16 A

CONSTRUCTION AND SAFETY STANDARDS

- Tropicalised resinated and easily replaced electronic card for complete protection from humidity, fitted in the case with an IP 65 protection.
- The electronic card inside the EASYSMALL has undergone the strictest EMC tests of electromagnetic compatibility (low emission of interference and a high immunity to disturbance) as a guarantee of its reliable use everywhere.

INSTALLATION AND USE

Flow and pressure sensing device for control and protection of single-phase pumps up to 2 HP (for domestic applications). It starts the pump when there is a drop in system pressure (e.g. when opening a tap) and stops the pump when the flow drops below 2 l/min (tap closed).

PATENTS - TRADE MARKS - MODELS

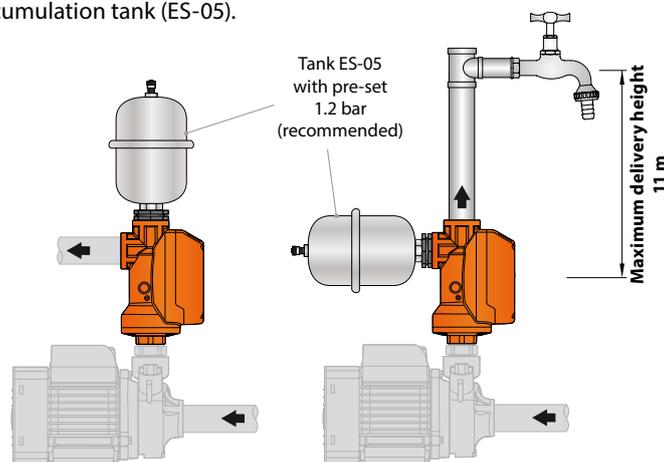

- Registered EU Design n. 001774928
- EASYSMALL® registered Trade Mark n. 0001511131

OPTIONS AVAILABLE ON REQUEST

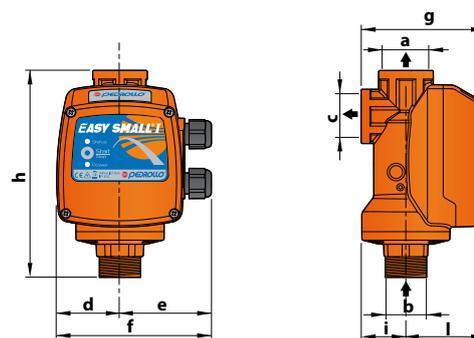

- Version with pressure gauge

STANDARD INSTALLATION

In order to avoid frequent restarts we advise installing a small accumulation tank (ES-05).

DIMENSIONS AND WEIGHT

MODEL	PORTS			DIMENSIONS mm						kg	
	a	b	c	d	e	f	g	h	i		l
EASYSMALL 1-2	1"	1"	1"	56	74	130	100	170	36	64	0.7

ACCESSORIES

- **ES-05** Stainless steel 0.5 litre tank (1")
- **GSR** Special three piece joint with an o-ring seal (1" M)

Electronic pressure regulator

 Domestic use

PERFORMANCE RANGE

- Max flow rate: **200 l/min** (12 m³/h)
- Working pressure: **8 bar**
- Restarting pressure: **2 bar**
(Adjustable between 1 and 5 bar)

APPLICATION LIMITS

- Maximum liquid temperature **+65 °C**
- Ambient temperature up to **+40 °C**
- Burst pressure **32 bar**
- Protection: **IP 65**
- Voltage: **230 V** - Frequency: **50/60 Hz** - Max current: **16 A**

PERFORMANCE DATA

MODEL	POWER (P ₂)		Volt	Hz	Current
	kW	HP			
EASYPRO	1.5	2	230	50/60	16 A

CONSTRUCTION AND SAFETY STANDARDS

- Resinated and easily replaced electronic card for a complete protection from humidity.
- The electronic card inside EASYPRO has undergone the strictest EMC tests of electromagnetic compatibility.

PATENTS - TRADE MARKS - MODELS

- Registered EU Design n. 976824
- Patent Pending n. IT 1388969, IT 1388970
- EASYPRO® registered Trade Mark n. 0001334546

OPTIONS AVAILABLE ON REQUEST

- Version with 1" NPT ports
- Version with cable and Schuko plug and socket

INSTALLATION AND USE

EASYPRO® stands out from the traditional PRESSURE FLOW SWITCHES because of a number of innovative characteristics:

- **the air filled integrated expansion tank;**
- **selection of the restart pressure of the pump;**
- **the back-lit LCD display.**

PUMP START PRESSURE

EASYPRO® enables you to select the restart pressure of the pump, between **1** and **5** bar.

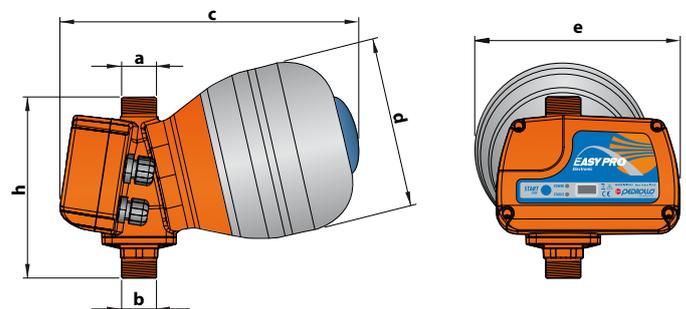

The pressure is selected using the control button and following the instructions on the LCD display. One model covers a wide range of installation requirements.

SURGE TANK

EASYPRO® includes an incorporated **3 litre** surge tank.

The substantial accumulation volume combined with its ability to absorb excess pressure, a typical surge tank characteristic, make it suitable for use in installations where other pressure flow regulators may prove inadequate. In order to guarantee optimum protection and accumulator performance, it is possible to adjust the tank pressure, the **factory setting is 1.8 bar**, based on the pump start pressure selected.

QST 2500	530ADL250A	18.5	25	45
QST 3000	530ADL300A	22	30	54
QST 4000	530ADL400A	30	40	68

- The control box is fitted with a selector for manual or automatic operation with the possibility of attaching a float (or a pressure valve, etc.) and fluid level probes which protect the pump from operating when dry.
- **Three-phase 400 V 50 Hz**

CONTROL BOXES

EVOLUTION - CONTROL BOXES FOR 4" AND 6" BOREHOLE PUMPS

MODEL	CODE	VOLTAGE	RATED CURRENT A
EVOLUTION-MONO	532DOM003M	Single-phase 230 V 50 Hz	from 2 to 18
EVOLUTION-TRI/1	532DOM075T	Three-phase 400 V 50 Hz	from 2 to 16
EVOLUTION-TRI/2	532DOM100T	Three-phase 400 V 50 Hz	from 16 to 22

- The control box contains an electronic card which makes it possible to regulate the threshold at which the protection against power overloads and short circuits intervenes; the electronic card also controls the value of $\cos \varphi$ in order to prevent dry operating of the pump without the help of fluid level probes.
- The control box may be connected to a float switch (or a pressure switch, etc.).

QES - CONTROL BOXES FOR SINGLE-PHASE DRAINAGE PUMPS

MODEL	CODE	MOTOR POWER (P ₂)		CAPACITOR	RATED CURRENT A
		kW	HP	CAPACITANCE	
Single-phase					
QES 300 MONO	52VX300A1	2.2	3	60 μ F	16
QES 300 MONO-AL (*)	52VX300A1AL	2.2	3	60 μ F	16

- The control box is pre-set for connection with the thermal protector inserted in the winding of the drainage pumps VXCm30, VXCm30-F, MCm30, MCm30-F.
- **Single-phase 230 V 50 Hz**

(*) QES 300 MONO-AL, control box with contacts for connection to an auxiliary float switch for level alarm

QES - CONTROL BOXES FOR THREE-PHASE DRAINAGE PUMPS

MODEL	CODE	MOTOR POWER (P ₂)		RATED CURRENT
		kW	HP	A
Three-phase				
QES 150	532QES150A	1.1	1.5	4.2
QES 200	532QES200A	1.5	2	5.2
QES 300	532QES300A	2.2	3	6.5
QES 400	532QES400A	3	4	8

- The control box is fitted with a selector for manual or automatic operation with the possibility of attaching a float, and with the thermal protector inserted in the winding of the drainage pumps VXC, VXC-F, MC, MC-F
- **Three-phase 380 ÷ 415V 50 Hz**

QED1 - ELECTRONIC CONTROL BOX FOR ONE DRAINAGE PUMP

MODEL	CODE	VOLTAGE	RATED CURRENT A
QED1-MONO	533QED01M	Single-phase 230 V 50 Hz	from 2 to 18
QED1-TRI	533QED01T	Three-phase 400 V 50 Hz	from 2 to 9

- The control box contains an electronic card which makes it possible to regulate the value of the current at which the protection intervenes against power overloads and short circuits.
- The control box is pre-set for connection with the thermal protector inserted in the winding of the drainage pumps VXC, VXC-F, MC, MC-F and of three floats (operation, stop and alarm level).

QED2 - ELECTRONIC CONTROL BOX FOR TWO DRAINAGE PUMPS

MODEL	CODE	VOLTAGE	RATED CURRENT A
QED2-MONO	533QED02M	Single-phase 230 V 50 Hz	from 2 to 18
QED2-TRI	533QED02T	Three-phase 400 V 50 Hz	from 2 to 9

- The control box contains an electronic card which makes it possible to regulate the value of the current at which the protection intervenes against power overloads and short circuits.
- The control box is pre-set for connection with the thermal protector inserted in the winding of the drainage pumps VXC, VXC-F, MC, MC-F of four floats (successive operation of the first pump, operation of the second pump, stop and alarm level).

FRICION LOSS CHART

(for straight pipes with 15-250 mm internal diameter and flow rates from 8 to 8330 l/min)

The data in the table refers to cold water and other liquids with the same kinematic viscosity and new cast iron pipes. The load losses (h_v) indicated in the table must be multiplied by: **0.8** for new steel pipes, **1.25** for old, slightly rusty iron pipes, and **1.7** for old pipes where the build-up of incrustations must be taken into account.

➔ **EXAMPLE:** Flow rate data **Q = 500 l/min**, new steel pipe Ø 80 mm, pipe length 50 m.

Find the flow rate on the horizontal axis and move vertically until you meet the DN 80 mm line.

The corresponding load losses can thus be found on the vertical axis.

$h_v = 4,6$ m for every 100 m of pipe.

$h_{v1} = 4,6 \times 0,8 = 3,68$ m/100 (steel pipe).

Considering the real length of the pipe:

$h_{v2} = 3,68 \times 50:100 = 1,84$ m (for 50 m of pipe).

The flow speed is determined by considering the position of the intersection point, which is between the oblique lines with value of 1.5-2 m/sec. In the case considered that gives: **C = 1.7 metres/sec**

CONVERSION OF UNITS OF MEASUREMENT

LENGTH

millimetre	centimetre	metres	inch	foot	yard
mm	cm	m	in	ft	yd
1	0.1	0.001	0.0394	0.0033	0.0011
10	1	0.01	0.3937	0.0328	0.0109
1000	100	1	39.3701	3.2808	10.936
25.4	2.54	0.0254	1	0.0833	0.0278
